History of Technology Volume 30 Ian Inkster,Angel Calvo,2016-03-31 This book focuses on the development of four key issues in the development of modern Spain knowledge manufacturing energy and telecommunications and public works If technology transfer from advanced nations to less developed systems always worked then the whole world would now be rich That this is not the case is so obvious we might well expect that the history of the processes successes and failures of technology transfer across nations would be a very well established field of enquiry In fact the theme is still a developing one and the present Special Issue centres on the case of Spain as exemplary in many respects The collected essays focus upon the four major themes of knowledge manufacturing energy and telecommunications and public works Essays range in time from the 18th century to the present time from studies of espionage and early links between craftsmen and savants to the institutions of technology from training systems to private enterprise activity or patents to case studies of silk manufacture shipbuilding mining paper making and pharmaceuticals Each essay offers a broad variety of material to bring to bear on a major problem of world development past present and future

[Science, Technology and Innovation Policies for Development](#) Gustavo Crespi,Gabriela Dutrénit,2014-04-11 This book examines the implementation of science technology and

innovation STI policy in eight Latin American countries and the different paths these policies have taken It provides empirical evidence to examine the extent to which STI policies are contributing to the development of the region as well as to the solution of market failures and the stimulus of the region s innovation systems Since the pioneering work of Solow 1957 it has been recognized that innovation is critical for economic growth both in developed and in less developed countries Unfortunately Latin America lags behind world trends and although over the last 20 years the region has established a more stable and certain macroeconomic regime it is also clear that these changes have not been enough to trigger a process of innovation and productivity to catch up Against this rather grim scenario there is some optimism emerging throughout the region After many years of inaction the region has begun to invest in science technology and engineering once again Furthermore after many changes in innovation policy frameworks there is now an emerging consensus on the need for a solution to coordination failures that hinder the interaction between supply and demand Offering an informative and analytic insight into STI policymaking within Latin America this book can be used by students researchers and practitioners who are interested in the design and implementation of innovation policies This book also intends to encourage discussion and collaboration amongst current policy makers within the region
