**Psychology of Intelligence Analysis** Richards J. Heuer,2006 This volume pulls together and republishes with some editing updating and additions articles written during 1978 86 for internal use within the CIA Directorate of Intelligence Four of the articles also also appeared in the Intelligence Community journal Studies in Intelligence during that time frame The information is relatively timeless and still relevant to the never ending quest for better analysis The articles are based on reviewing cognitive psychology literature concerning how people process information to make judgments on incomplete and ambiguous information I selected the experiements and findings that seem most relevant to intelligence analysis and most in need of communication to intelligence analysts Cognitive psychologists and decision analysts may complain of oversimplification while the nonpsychologist reader may have to absorb some new terminology Unfortunately mental processes are so complex that discussion of them does require some specialized vocabulary Intelligence analysts who have read and thought seriously about the nature of their craft should have no difficulty with this book

Gregory F. Treverton,Claybourne Bryan Gabbard,2008 This report assesses the tradecraft of intelligence analysis across the main U S intelligence agencies such as the Central Intelligence Agency and the National Security Agency and recommends improvements The report makes a number of recommendations for improving analysis for a world of threats very different from that of the Cold War It focuses on the two essentials of analysis first people second the tools they have available The December 2004 intelligence reform legislation set in motion initiatives that move in the right direction The creation of a Deputy Director of National Intelligence for Analysis will provide a real hub for developing tradecraft and tools and for framing critical tradeoffs The establishment of a National Intelligence University will provide a focal point for training in analysis The creation of a National Counterterrorism Center will shift intelligence analysis toward problems or issues not agencies or sources The building of a Long Term Analysis Unit at the National Intelligence Council can lead away from the prevailing dominance of current intelligence And the formation of an Open Source Center can create a seed bed for making more creative use of open source materials These specific initiatives are promising but they are just the beginnings For all the language about the importance of intelligence analysis data sharing fusion and the like the national and Intelligence Community leadership today devalues intelligence analysis A fundamental change is also needed in attitudes and existing organizational cultures
