The Anatomy Of Historical Knowledge:

The Anatomy of Historical Knowledge Maurice Mandelbaum, 2019-12-01 Originally published in 1977 In this major work an overview of the structure of historical writing Maurice Mandelbaum clarifies some of the problems concerning the nature of history as a discipline of what constitutes explanation in history and whether historical knowledge is as reliable as other forms of knowledge The work is divided into three parts The first part provides an analytic account of different types of historical inquiry The second treats at length the nature of causal explanation in everyday life and in science and considers the relation between causes and laws The final part analyzes the concept of objectivity and estimates both the extent to which the inquiries of historians can be said to be objective and the limits of that objectivity in some types of historical accounts

The Anatomy of Historical Knowledge Maurice Mandelbaum, 2019 *Historical Knowledge* Susanna Fellman, Marjatta Rahikainen, 2011-10-18 *Historical Knowledge* approaches the topic of historical knowledge in depth and from various angles It seeks to offer theoretical and methodological building blocks for the use of anyone pursuing historical research This book brings novel insights into classic and topical issues currently under debate the importance of theory in historical thinking the dialectic of text and annotation the actor and observer levels the relationship between the general and the individual the issue of comparison and the problem of sporadic sources and of understanding the singularity of each one The overall theme of the book the possibility of historical knowledge reflects the very issue that makes historical research distinctive the challenges of evidence and the problems both concrete and conceptual with deciphering and interpreting remnants of the past This book refreshes the discussion about sources and proper evidence two issues that the linguistic turn and the postmodern challenge pushed into the background The book addresses these issues in an easily accessible way and serves as an introduction and guide to the role of theory method and evidence in historical research not only for students and scholars of history but also for anyone outside the field with an interest in the topic *Historical Knowledge* is the first book to include texts by the three eminent historians Professors Natalie Zemon Davis Carlo Ginzburg and Giovanni Levi The other contributors Professors Risto Alapuro Janken Myrdal and Matti Peltonen are active debaters in current theoretical and methodological discussion

Adapting Historical Knowledge Production to the Classroom P.V. Kokkotas, K.S. Malamitsa, A.A. Rizaki, 2011-10-18 The aims of this book are to contribute to professional development of those directly involved in science education science teachers elementary and secondary science teacher advisors researchers in science education etc to contribute to the improvement of the quality of science education at all levels of education with the exploitation of elements from History of Science incorporated in science teaching it is argued that through such approaches the students motivation can be raised their romantic understanding can be developed and consequently their conceptual understanding of science concepts can be improved since these approaches make science more attractive to them and to contribute to the debate about science

education at the international level in order to find new ways for further inquiry on the issues that the book is dealing with. The book is divided in two parts. The first expounds its philosophical and epistemological framework and the second combines theory and praxis, the theoretical insights with their practical applications.

Historical Knowledge, Historical Error
Allan Megill, 2007-02. In the past thirty years, historians have broadened the scope of their discipline to include many previously neglected topics and perspectives. They have chronicled language, madness, gender, and sexuality and have experimented with new forms of presentation. They have turned to the histories of non-Western peoples and to the troubled relations between the West and the rest. Allan Megill welcomes these developments but he also suggests that there is now confusion among historians about what counts as a justified account of the past. In *Historical Knowledge, Historical Error*, Megill dispels some of the confusion. Here he discusses issues of narrative, objectivity, and memory. He attacks what he sees as irresponsible uses of evidence while accepting the art of speculation which incomplete evidence forces upon historians. Along the way, he offers succinct accounts of the epistemological road historians have traveled from Herodotus and Thucydides through Leopold von Ranke and Alexis de Tocqueville and on to Hayden White, Natalie Zemon Davis, and Lynn Hunt. *The Concept of Structure and Historical Knowledge*, Harriet Joyce Kern, 1967. **Medical Library and Historical Journal**, 1907.
