*The Animal Mind* James L. Gould,Carol Grant Gould,1994 In this volume James and Carol Gould go in search of the animal mind Taking a fresh look at the evidence on animal capacities for perception thought and language the Goulds show how scientists attempt to distinguish actions that go beyond the innate or automatically learned They provide captivating beautifully illustrated descriptions of a number of clever and curious animal behaviors some revealed to be more or less preprogrammed some seemingly proof of a well developed mental life The Goulds conclude by examining what animal consciousness studies have revealed about one species in particular ourselves Here these expert authors who once counted themselves among the skeptics show just how much opinions have changed They suggest that human and animal consciousness may differ in degree of complexity but not necessarily in kind and that the study of other animal minds can tell us much about our own It is a provocative closing for this examination of one of modern science s most controversial topics

WASHBURN,2018 *The Animal Mind* Margaret Floy Washburn,2017-09-16 Excerpt from The Animal Mind A d104 Book of Comparative Psychology The advance of comparative psychology during the past nine years has been remarkable In preparing a second edition of this book I have tried to include every newly discovered fact of the first importance but the literature is now so extensive that in order to keep the bibliography within reasonable limits I have had to exercise more selection than I did in preparing the bibliography for the first edition For like reasons the text of the book does not enter so fully into detail in describing the results of a particular investigation as was possible when the material at hand was so much less in amount More than half the book has been completely rewritten including the chapters on Vision on Spatially Determined Reactions and on The Modification of Conscious Processes by Individual Experience I hope that the edition represents an advance upon its predecessor not only by including many newly ascertained facts but also by presenting its subject matter in more logical form About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works Inside the Animal Mind Pamela Weintraub,2021-04-13 Elephants can count Dogs read our expressions Cows have personality Fish feel Pain What do animals know and feel Are they creative can they actually make art Do they grieve or have agency the ability to make decisions intentionally manipulate other creatures even us or love Animals have extraordinary abilities Their feelings are much like ours and some of their cognitive skills equal our own Inside the Animal Mind unpacks their inner lives and their relationship to us Animal consciousness has long been fascinating but

difficult to penetrate Today that is changing and fast Researchers say that each creature has evolved a suitable intelligence and emotional life for its own role in the world Dogs have minds that race though time on the fast track in line with their quick metabolisms Cats have a detailed language of meows to communicate specifically with humans The octopus with eight interacting arms has a wildly complex brain Readers will learn about how dogs love us the special skills of horse therapists and the wisdom of communities of bees We explore how animals remember how they love the nature of their self awareness and moral codes and how they have fun
