The Anthroposophical Approach To Medicine Vol I:

The Anthroposophical Approach to Medicine Friedrich Husemann, Otto Wolff (Dr. med.), 1982 Today's medicine is strongly influenced by natural science which focuses entirely on the material nature of reality. Molecular biology has become the foundation of modern medicine with the result that today's medical industry chases after technology to solve all its problems. In the process it is losing its own essence as it moves into fields increasingly alien to human nature as a whole. Nevertheless many doctors are beginning to reexamine this exclusive worldview in favor of a more wholistic approach to healing. To this end anthroposophical medicine encompasses a wide range of healing modalities including orthodox allopathic medicine. The Anthroposophical Approach to Medicine explores the body's relationship to soul and spirit on the basis of Rudolf Steiner's insights into the activities of the spiritual world. Edited by doctors Friedrich Husemann and Otto Wolff this book invites us to an in depth view of a true alternative to materialistically oriented medicine. Chapters include essays on childhood development and diseases, the disorders of old age, neuroses and psychological imbalances, pharmacology, healing plants, biochemistry and pathology, blood work and special diagnostic techniques. This first of a multi volume series is an invaluable tool to all who want to extend the practice of medicine to include the whole human being. **The**

Wolff, 1989-02-01 **The Earthwise Herbal, Volume I** Matthew Wood, 2008-06-03 The first part in a comprehensive two volume guide on the use of medicinal plants in Western herbal medicine from an author who has almost forty years of clinical experience. modern Western herbalism Author Matthew Wood describes characteristic symptoms and conditions in which each plant has proved useful in the clinic often illustrated with appropriate case histories He also takes a historical view based on his extensive study of ancient and traditional herbal literature Written in an easy engaging non technical style The Earthwise Herbal offers insight into the logic of the plant how it works in what areas of the body it works how it has been used in the past what its pharmacological constituents indicate about its use and how all these different factors hang together to produce a portrait of the plant as a whole entity Ideal for beginners serious students or advanced practitioners The Earthwise Herbal is also useful for homeopaths and flower essence practitioners as it bridges these fields in its treatment of herbal medicines

The Burning Bush Edward Reaugh Smith,1997 Even more significant for Christianity in the long run than the twentieth century Dead Sea and Nag Hammadi discoveries is the growing North American awareness of Rudolf Steiner s works Virtually unavailable until the end of the twentieth century English translations from the German archives are gradually coming into print Both Steiner and his works have thus far been virtually unknown in traditional theological circles No Bible commentary has yet reflected the remarkable spiritual insights of Anthroposophy Now ten years after first encountering a written comment about Rudolf Steiner Ed Smith combines his own extensive traditional biblical knowledge with his years of concentrated study and reflection on hundreds of assembled works by Steiner The result is the first Bible commentary in the light of anthroposophic insight This is the first volume of a series of Bible commentary by the author It is based on the anthroposophic understanding given to humanity by Rudolf Steiner during the first quarter of the twentieth century Bible commentaries have always reflected the general line of thinking of their authors However the dramatic newness of anthroposophic thought means that perhaps the usual method of using a Bible commentary is not appropriate here A large part of The Burning Bush is necessarily devoted to laying an anthroposophic or spiritual scientific groundwork A major assumption indulged in most Bible commentaries that one can go directly to portions dealing with given passages of scripture and understand what is being said about them does not fit

The Vaccination Dilemma Christine Murphy, 2002 In their first five years of life children are expected to undergo 37 doses of eleven different vaccines yet relatively few parents are aware of the risks of chronic disease injury or death that some vaccines can present A growing body of research has linked immunization with autism seizures asthma arthritis Crohn's disease and even hyperactivity and learning disabilities yet we continue to use vaccination as insurance even against diseases that no longer pose a significant threat Christine Murphy has compiled a book that presents the vaccination dilemma from multiple perspectives It clearly describes the immune system and its workings and what science does and does not know about them It offers suggestions and resources for parents whose children are sick whether from a common childhood illness or from a vaccination reaction And it makes a case for an alternate view of disease as a teacher that allows us to develop physically and spiritually and as a necessary test of strength that we have chosen out of our destiny This book will help educate parents about the vaccination dilemma and prepare them to make in consultation with one or more health professionals educated vaccination decisions for their children *Encountering the Self* Hermann Koepke, 1989 Provides a lucid explanation of the events happening in the life of a child between the ninth and tenth years This is the time when the child's ego incarnates more deeply As a result children at that age often experience themselves for the first time as separate individuals different from their parents and peers and essentially alone As Koepke points out this inner experience is often accompanied by a first encounter with death in the child's environment a first inkling that life is fragile and does not go on forever Fundamentals of Anthroposophical Medicine Rudolf Steiner, 1986-01-01 **Spiritual Science and the Art of Healing** Victor Bott, 1996-05 Rudolf Steiner's anthroposophical medicine highly regarded and widely practiced in Europe integrates allopathic medical practices with alternative remedies including dietary and nutritional therapies massage hydrotherapy art therapy and counseling It recognizes that health and illness are directly related to our states of consciousness and it views illness as an opportunity to create a new state of physical emotional and spiritual balance Modern medicine tends to consider only the material aspect of human beings an approach that fails to bring the individual to a state of complete wellness Steiner's holistic view of humanity beings composed of body soul and spirit takes into consideration the

seven year cycles of human development the influence of education on health the relationship between psychological symptoms and physical conditions the problem of cancer the four cardinal organs heredity and the spiritual balance that characterizes true health New revised edition of Anthroposophical Medicine *The Pharos of Alpha Omega Alpha-Honor Medical Society* Alpha Omega Alpha,1988 **Introducing Anthroposophical Medicine** Rudolf Steiner,1999 These lectures the first on medicine by Rudolf Steiner outline the foundation for an anthroposophical approach to health and illness Steiner begins with a discussion of various contemporary views of illness and pathology He goes on to explore illnesses in relation to the whole human being looking at the various processes and organs in relation to the human threefold organization Homeopathy naturopathy and allopathy are discussed in the light of the spiritual nature of the human being and in terms of the ways various planets and the cosmos influence healing substances On the whole Steiner s approach rests on the long tradition of Western medicine without negating its roots Perhaps more than anywhere else Steiner s enthusiasm and familiarity with the subject is in evidence here Steiner describes many specific illnesses and their treatments and how doctors must develop their ability to diagnose illnesses and prescribe treatments based on their own inner capacities
