The Apes Reflexion:

The Ape's Reflexion Adrian J. Desmond, 1980-01 **'Language' and Intelligence in Monkeys and Apes** Sue Taylor Parker, Kathleen Rita Gibson, 1994-01-28 This is the first collection of articles completely and explicitly devoted to the new field of comparative developmental evolutionary psychology that is to studies of primate abilities based on frameworks drawn from developmental psychology and evolutionary biology These frameworks include Piagetian and neo Piagetian models as well as psycholinguistic ones The articles in this collection originating in Japan Spain Italy France Canada and the United States represent a variety of backgrounds in human and nonhuman primate research including psycholinguistics developmental psychology cultural and physical anthropology ethology and comparative psychology The book focuses on such areas as the nature of culture intelligence language and imitation the differences among species in mental abilities and developmental patterns and the evolution of life histories and of mental abilities and their neurological bases The species studied include the African grey parrot cebus and macaque monkeys gorillas orangutans and both common and pygmy chimpanzees **The Mentalities of Gorillas and Orangutans** Sue Taylor Parker, Robert W. Mitchell, H. Lyn Miles, 1999-08-26 Research on the mental abilities of chimpanzees and bonobos has been widely celebrated and used in reconstructions of human evolution In contrast less attention has been paid to the abilities of gorillas and orangutans This 1999 volume aims to help complete the picture of hominoid cognition by bringing together the work on gorillas and orangutans and setting it in comparative perspective The introductory chapters set the evolutionary context for comparing cognition in gorillas and orangutans to that of chimpanzees bonobos and humans The remaining chapters focus primarily on the kinds and levels of intelligence displayed by orangutans and gorillas compared to other great apes including performances in the classic domains of tool use and tool making imitation self awareness social communication and symbol use All those wanting more information on the mental abilities of these sometimes neglected but important primates will find this book a treasure trove **Biology as Society, Society as Biology: Metaphors** Sabine Maasen, E. Mendelsohn, P. Weingart, 2013-12-01 not lie in the conceptual distinctions but in the perceived functions of metaphors and whether in the concrete case they are judged positive or negative The ongoing debates reflect these concerns quite clearly namely that metaphors are judged on the basis of supposed dangers they pose and opportunities they offer These are the criteria of evaluation that are obviously dependent on the context in which the transfer of meaning occurs Our fundamental concern is indeed the transfer itself its prospects and its limits Looking at possible functions of metaphors is one approach to understanding and elucidating sentiments about them The papers in this volume illustrate by quite different examples three basic functions of metaphors illustrative heuristic and constitutive These functions represent different degrees of transfer of meaning Metaphors are illustrative when they are used primarily as a literary device to increase the power of conviction of an argument for example Although the difference between the illustrative and the heuristic function of metaphors is not

great it does exist metaphors are used for heuristic purposes whenever differences of meaning are employed to open new perspectives and to gain new insights In the case of constitutive metaphors they function to actually replace previous meanings by new ones Sabine Maasen in her paper introduces the distinction between transfer and transformation
