

# WIND

6.6% global electricity generation (2021)

1 Wind flows over the blades of a wind turbine, creating mechanical power by turning the blades.

1

2

The blades are connected to a drive shaft that turns an electric generator to produce electricity.

# GEOHERMAL

<1% global electricity generation (2021)

As the water reaches the surface, it boils over into steam, which rotates a steam turbine.

The turbine is connected to a generator that produces electricity.

E

1

Hot water from underground reservoirs is pumped using pipes or wells.

2

3

# SOLAR

3.7% global electricity generation (2021)

Photovoltaic (PV) cells contain thin semiconductor wafers, forming an electric field.

1

When light hits the cell, electrons are knocked loose from the semiconductor material and move in response to the electric field.

2

3

This generates electricity, transferred through metal conductors on the PV cell.

## Five Major Types of RENEWABLE ENERGY

Global renewable energy capacity is expanding at a record pace. What are the major types of renewables, and how do they work?

# HYDRO

15.3% global electricity generation (2021)

Dams or other diversion structures alter the natural flow of water to increase its elevation and volume.

1

Water flows through the dam, generating mechanical energy that spins a turbine connected to an electric generator.

2

# BIOMASS

2.3% global electricity generation (2021)

1 Biomass is burned in a boiler to produce steam.

1

2

Steam rotates the blades of a turbine connected to a generator that produces electricity.

3

Biomass can also be converted into other liquid or gaseous fuels used to generate electricity.

\* Represents the lifetime cost of a new power plant divided by total generation

S. Department Energy,2015-06-11 This Guide has been created to help Federal agencies effectively develop large scale renewable energy projects at Federal facilities For the purposes of this Guide large scale Federal renewable energy projects are defined as renewable energy facilities larger than 10 megawatts MW that are sited on Federal facilities property and lands and are typically financed and owned by third parties Because these projects often rely on private investment it is necessary for Federal agencies to understand the types of large scale renewable energy projects that the private sector is pursuing In other words if the projects that need private sector funding do not attract the private sector they will never be built Therefore this Guide provides the Federal employee with an understanding of a common process that private sector developers use to select projects for investment To accomplish Federal goals for renewable energy sustainability and energy security large scale renewable energy projects must be developed and constructed on Federal sites at a significant scale with significant private investment The U S Department of Energy s Federal Energy Management Program FEMP helps Federal agencies meet these goals and assists agency personnel navigate the complexities of developing such projects and attract the necessary private capital to complete them This Guide is intended to provide a general resource that will begin to develop the Federal employee s awareness and understanding of the project developer s operating environment and the private sector s awareness and understanding of the Federal environment Because the vast majority of the investment that is required to meet the goals for large scale renewable energy projects will come from the private sector this Guide has been organized to match Federal processes with typical phases of commercial project development FEMP collaborated with the

National Renewable Energy Laboratory NREL and professional project developers on this Guide to ensure that Federal projects have key elements recognizable to private sector developers and investors The main purpose of this Guide is to provide a project development framework to allow the Federal Government private developers and investors to work in a coordinated fashion on large scale renewable energy projects The framework includes key elements that describe a successful financially attractive large scale renewable energy project **Home Power** ,2007
