**consciousness in different senses** Naotsugu Tsuchiya,Jeroen J. Van Boxtel,2013-06-03 Although often used in everyday speech and in the scholarly literature selective attention and consciousness lack clear undisputed definitions Partly because of this deficit there exists a lively debate on the relationship between the two Nevertheless attention has been studied scientifically for a long time because a variety of tasks allow researchers to control several of its aspects e g focused and feature based attention Consciousness as a scientific subject of study has emerged more recently but is now rapidly gaining traction Scientific studies of consciousness concern the state or level of consciousness e g awake as opposed to in coma dreamless sleep or under anaesthesia as well as the contents of consciousness or the phenomenology of perception With the

increase in consciousness focused research there is a concomitant surge in research examining the relationship between attention and consciousness This relationship between attention and consciousness is the topic of this Research Topic Contributions related to or focused solely on attention or on consciousness will not be considered It had long been assumed that attention and consciousness are inextricably intertwined two sides of the same coin However recently substantial evidence has emerged that attention and consciousness are interacting but separable processes It is however debated how tight the interactions are and what the exact nature of the relationship is Therefore we invite researchers from different camps to provide opinionated but balanced literature reviews Different groups will interpret the same data in different ways We feel that combining these views in one Research Topic is immensely valuable to researchers from different fields Apart from reviews we also invite potential contributors to provide new and exciting evidence in the form of original contributions that may support any of the different views Even though attention and consciousness are critical aspects of many different cognitive processes they are mainly studied though not exclusively in the domain of visual perception In other sensory modalities e g olfaction or audition it is currently not clear whether distinctions between attention and consciousness exist which is even more true for other cognitive processes such as memory Therefore we specifically invite contributions covering the auditory somatosensory olfactory and memory domain We ask all contributors to provide discussions on the relationship between attention and consciousness and focus on 1 the influence of attention on sensory processing 2 the formation of conscious perception 3 the evidence for unconscious processing and its modulation by attention 4 potential indications for dissociations between attention and consciousness e g does paying attention to a stimulus decrease performance on e g a discrimination task 5 neuroimaging and neurophysiology data pertaining to these questions Often one is caught in one s own research field and lacks the time or the knowledge to delve into another field This Research Topic should provide a great overview in great breadth of the current state of knowledge on the links between attention and consciousness and their interactions in several different sensory modalities

**The New American Spirituality** Elizabeth Lesser, 1999 Elizabeth Lesser offers up a rich cornucopia of lessons for the soul in *The New American Spirituality*, a warm and fascinating account of a modern pilgrimage. Daniel Goleman, Ph.D., author of *Emotional Intelligence*. In the crowded field of books dealing with spirituality, psychology, and religion, what has been missing is a comprehensive, authoritative guide to the many choices facing spiritual seekers today. *The New American Spirituality* fills that need. This encouraging, empowering user's manual for the soul teaches you how to chart a unique and personal path through the diverse landscapes of the American spiritual quest. In 1977, Lesser cofounded the Omega Institute, now America's largest adult education center focusing on wellness and spirituality. Working with many of the eminent thinkers and practitioners of our times in the fields of religion, psychology, mysticism, science, and healing, Lesser found that the hunger for a spiritual life can be satisfied by a rich blend of the world's wisdom traditions. In *The New American Spirituality*, she synthesizes the lessons she has learned from different belief systems and intertwines them with illuminating stories from her life as a seeker, teacher, daughter, wife, and mother. She answers pertinent questions: how do you determine what is right for you from the many strains of the modern spiritual search? how do you assess a teacher or practice? how can you gauge your progress while warning of the tendency to miss out on real growth by merely dabbling in the latest fads? Recounting her own trials and errors and offering meditative exercises as well as references to some of the world's great spiritual teachers, Lesser provides directions through the four landscapes of the spiritual journey: the mind, developing awareness, learning meditation, easing stress and anxiety, the heart, finding what one really loves, dealing with grief and loss, becoming fully alive, the body, returning the body to the spiritual fold, healing, coping with aging and the fear of death, the soul, naming God for ourselves, exploring other realms of consciousness, trusting the mysterious nature of the universe, developing compassion and forgiveness. Warm, accessible, and wise, *The New American Spirituality* is a cross-disciplinary sourcebook for the millions of Americans who, whether or not they participate in an organized religion, wish to incorporate a more meaningful, joyful, and individualized spirituality into their daily lives.
