**Intermedial Representations of 9/11 in U.S. American and German Newspapers** Susanne Ehrenreich-Blažeković, 2010 For many weeks the terrorist attacks of 9 11 dominated the newspapers which covered the consequences with an unprecedented immediateness This study looks at diverging representations of 9 11 in U S and German newspapers New York Times Washington Post Frankfurter Allgemeine Zeitung S ddeutsche Zeitung and explores effects on its possible readerships The impact of the attacks forms of heroism the enactment of leadership various demonstrations of patriotism and grief as well as the textual and visual presentation of the attacks are analyzed in detail These intermedial representations reaffirm or contest U S American grand narratives While the German newspapers tend to focus on information and analysis the U S papers tend to strengthen shattered U S American identity constructions The study is based on nearly 2 000 newspaper articles and documents the wide scope of topics prevalent in the post 9 11 newspaper coverage

**Recombinant Urbanism** David Grahame Shane, 2005-06-17 This book provides a simple but comprehensive framework for the emerging academic discipline of urban design from its origins in Europe and America to contemporary issues of imagery finance and marketing in an age of globalisation There is currently no contemporary textbook for urban design that includes a general history and theory of the subject Internationally urban design is more and more becoming a core subject taught in architecture schools The AIA US and the RIBA UK both require undergraduates and graduates to study the urban dimension of architectural design On a wider scale in Europe the EU is developing a common architectural curriculum which includes an urban component for undergraduates The situation is similar in schools across Asia and Australia Aimed at both students and teachers this book provides a simple and accessible framework from the origins of urban design and the main techniques developed to deal with the design of fragments of cities to participatory planning processes codes imagery finance and marketing Finally it proposes an innovative vision of contemporary practice based on the work of leading actors and projects in the field This book is set to become the key textbook at undergraduate and graduate levels It is written in an accessible and direct tone and highly illustrated with many colour and black and white diagrams It includes a general history and theory of urban design and provides an up to date account of contemporary urban conditions Praise for Recombinant Urbanism Documents a major intellectual advance eagerly awaited by academics and practitioners all around the world should become a standard text for schools of architecture and urbanism Leon Van Schaik Innovation Professor of Architecture RMIT Australia both unique and instrumentally positive The book is the result of many years of research and writing and is a small masterpiece in urban studies It has already proved its worth in the teaching of urban studies at Columbia the AA the Bartlett School and Cooper Union to mention only a few of the universities where Dr Shane has had a powerful influence It is indeed one of the very best manuscripts I have read in the field in the last few years Anthony Vidler Professor and Dean Irwin S Chanin School of Architecture Cooper Union New York USA I can say without hesitation that I fully endorse Grahame s work the issues it

covers are highly topical and such a book would indeed be widely read by architecture students urban designers and planners Colin Fournier Professor of Architecture again Shane has made important urban theories and thinking more widely available to an international student audience The legacy the book will have will be in convincing people that the design of cities matters not in the overbearing and over controlling sense of new urbanism but in reinforcing the multiple possibilities of contemporary life Brian McGrath Adjunct Associate Professor of Architecture Columbia University USA
