Trazos del capitalismo planetario René Pedroza Flores, 2023-12-01 El capitalismo como sistema económico basado en la propiedad privada de los medios de producción en el libre mercado y en la explotación del trabajo no ha permanecido invariable en el transcurso de la historia. La acumulación del capital se expande a través de la expropiación y la explotación ahora ya no solamente de la naturaleza y de la vida humana sino que también se incluye el planeta. El capitalismo se ha fortalecido a tal grado que hoy es un sistema económico planetario y con variantes en su desarrollo entre los diferentes países recibe denominaciones como capitalismo democrático, capitalismo autoritario, capitalismo benefactor, capitalismo moral, capitalismo depredador, etc. El apellido cambia no así su esencia. Su espíritu insaciable se traduce en pobreza, desigualdad, inequidad e injusticia a lo que se suman nuevos problemas relacionados con el calentamiento global del planeta como el cambio climático y la lucha por los recursos naturales más esenciales. El estudio sobre el capitalismo del siglo XXI se puede abordar desde prismas prácticos o teóricos. En este libro el lector encontrará tres ejes esenciales: la libertad económica y la democracia, la geopolítica expansionista y la geoguerra multifacética. Son tres dimensiones interrelacionadas y que sirven de fundamento al capitalismo para su expansión. En nombre de la libertad económica y la democracia los países representantes del capitalismo con los Estados Unidos de América a la cabeza tratan de imponer como valores universales la libertad de mercado, la democracia representativa y las libertades civiles para intensificar y extender su dominio a través de medios diplomáticos y sobre todo del recurso de la guerra. En esta obra se presentan evidencias del estado actual que guardan los tres ejes estudiados y se exponen los índices internacionales que muestran el lugar que ocupan los países en el ámbito internacional. Llama la atención que ninguno de los países que figuran en dichos índices se aproxime siquiera al 100 % de libre mercado ni al 100 % de democracia. Esto debe a empujar a los pensadores procapitalistas a repensar los pilares sobre los cuales han causado un desastre mundial que lejos de acabar se acentúa a cada día que pasa.

Escrituras descentradas Ana Cecilia Olmos, 2022-05-27 Este libro reúne un conjunto de artículos que indagan sobre el ensayo de los escritores de ficción en América Latina de 1970 a la actualidad. El tema delimita una cuestión específica: pensar sobre la instancia discursiva en que el escritor se despoja de las mediaciones de la ficción, el narrador, el personaje y asume una enunciación subjetiva ligada al nombre propio y en consonancia con una experiencia íntima. Por cierto, retornar al ensayo en los días de hoy en que la literatura se ofrece como espacio de exploración de las más variadas formas del registro autobiográfico al punto de invalidar la distinción entre lo vivido y lo imaginado no significa restituir un debate sobre las especificidades de los géneros literarios. Especificidades que sabemos la literatura en su linaje moderno se empeña en disolver. Al contrario, supone volver a una forma de escritura que desde sus orígenes hizo de la libertad su principio constitutivo, aproximando la palabra literaria a la experiencia del sujeto en un movimiento de identificación con la
