Treasure Island Jane Brierley, Robert Louis Stevenson, 1997

The Subaltern Speak Michael W. Apple, Kristen L. Buras, 2013-01-11 The question of whose perspective experience and history is privileged in educational institutions has shaped curriculum debates for decades In this insightful collection Michael W Apple and Kristen L Buras interrogate the notion that some knowledge is worth more than others The Subaltern Speak combines an analysis of the ways in which various forms of power now operate with a specific focus on spaces in which subaltern groups act to reassert their own perceived identities cultures and histories *Handbook of Cultural Politics and Education*, 2010-01-01 In academia the effects of the cultural turn have been felt deeply In everyday life tenets from cultural politics have influenced how people behave or regard their options for action such as the reconfiguration of social movements protests and praxis in general Many authors writing in this field are known for their scholarship and social activism both of which are arguably guided by principles of cultural politics about the nature of representation and the deployment of power in political discourses The Handbook of Cultural Politics and Education is less an attempt to standardize contemporary educational scholarship and more a collection that engages the problems and promises of recent themes in social and cultural thought which require our attention and demand a response In other words it opens doors to questions rather than convenient answers to difficult educational dilemmas The Handbook is part of the appraisal of an opening created by interdisciplinary writings on such themes as representation civil society cultural struggle subjectivity and media within the context of education Indeed cultural politics troubles traditional frameworks in search of critical explanations concerning education s place within society The contributions in the collection support this endeavor Handbook of Research on Media Literacy in the Digital Age Yildiz, Melda N., Keengwe, Jared, 2015-12-02 With the current ubiquity of technological tools and digital media having the skillset necessary to use and understand digital media is essential Integrating media literacy into modern day education can cultivate a stronger relationship between technology educators as well as students The Handbook of Research on Media Literacy in the Digital Age presents key research in the field of digital media literacy with a specific emphasis on the need for pre service and in service educators to become familiar and comfortable with the current digital tools and applications that are an essential part of youth culture Presenting pedagogical strategies as well as practical research and applications of digital media in various aspects of culture society and education this publication is an ideal reference source for researchers educators graduate level students and media specialists Rightist Multiculturalism Kristen L. Buras, 2010-11-24 For nearly two decades E D Hirsch s book Cultural Literacy has provoked debate over whose knowledge should be taught in schools embodying the culture wars in education Initially developed to mediate against the multicultural threat his educational vision inspired the Core Knowledge curriculum which has garnered wide support from an array of communities including traditionally marginalized groups In this groundbreaking book Kristen Buras provides the first detailed critical examination

of the Core Knowledge movement and explores the history and cultural politics underlying neoconservative initiatives in education. Ultimately, Rightist Multiculturalism does more than assess the limitations and possibilities of Core Knowledge. It illuminates why troubling educational reforms initiated by neoconservatives have acquired grassroots allegiance despite criticism that their vision is culturally elitist. More importantly, Buras argues understanding that neoconservative school reform itself has become a multicultural affair is the first step toward fighting an alternative war of position that is reclaiming multiculturalism as a radically transformative project.
