Art in Theory Paul Wood,Leon Wainwright,Charles Harrison,2020-12-21 A ground breaking new anthology in the Art in Theory series offering an examination of the changing relationships between the West and the wider world in the field of art and material culture Art in Theory The West in the World is a ground breaking anthology that comprehensively examines the relationship of Western art to the art and material culture of the wider world Editors Paul Wood and Leon Wainwright have included 370 texts some of which appear in English for the first time The anthologized texts are presented in eight chronological parts which are then subdivided into key themes appropriate to each historical era The majority of the texts are representations of changing ideas about the cultures of the world by European artists and intellectuals but increasingly as the modern period develops and especially as colonialism is challenged a variety of dissenting voices begin to claim their space and a counter narrative to western hegemony develops Over half the book is devoted to 20th and 21st century materials though the book s unique selling point is the way it relates the modern globalization of art to much longer cultural histories As well as the anthologized material Art in Theory The West in the World contains A general introduction discussing the scope of the collection Introductory essays to each of the eight parts outlining the main themes in their historical contexts Individual introductions to each text explaining how they relate to the wider theoretical and political currents of their time Intended for a wide audience the book is essential reading for students on courses in art and art history It will also be useful to specialists in the field of art history and readers with a general interest in the culture and politics of the modern world **The Englishwoman** ,1918 **Chaos and Cosmos** Karen Lang,2018-08-06 Writing in 1940 the prominent German art historian Erwin Panofsky asked How then is it possible to build up art history as a respectable scholarly

discipline if its objects come into being by an irrational and subjective process In *Chaos and Cosmos* Karen Lang addresses the power of art to resist the pressures of the transcendental vantage point history Uncovering the intellectual and cultural richness of the early years of academic art history in Germany the period from the 1880s to 1940 she explores various attempts within art history to transform aesthetic phenomena chaos into the cosmos of a systematic unified field of inquiry Lang starts by examining Panofsky s approach to aesthetic phenomena in his early theoretical essays alongside Ernst Cassirer s contemporaneous publications on the substance and function of scientific concepts and on Einstein s theory of relativity She then turns to the subject of aesthetic judgment through a rereading of Kantian subjectivity and Kant s uneasy legacy in art history From here Lang considers the different organizing theories of symbolic form proposed by Aby Warburg and Cassirer as well as Goethe s inspiration for both Alois Riegl s notion of age value and Walter Benjamin s conceptions of the aura concluding with an extended examination of objectivity and the figure of the art connoisseur Extensively illustrated with works of art from the Enlightenment to the present day this venturesome book illuminates an intellectual legacy that has profoundly shaped the study of the history of art in ways that have until now been largely unacknowledged Addressing the interplay of chaos and cosmos in terms of history art history philosophy and epistemology Lang traces shifts in point of view in art history and the way these shifts change aesthetic objects into historical objects and even objects of knowledge
