Project Learning Tree ,1994   **Smallholder Tree Growing for Rural Development and Environmental Services** Denyse J. Snelder,Rodel D. Lasco,2008-07-19 Recent history reveals that both the large scale reforestation projects of the 20th century have often been less successful than anticipated and that tree growing by smallholders as an alternative means to combat deforestation and promote sustainable land use has received relatively little attention from the scientific and development communities Taking a first step to addressing that balance this collection of peer reviewed papers adopts a comparative approach to explore the potential role that tree growing by farmers can play in sustainable forest management The goal of this approach is to identify common threads and to start to develop a framework for future research and practice Presenting case studies from the Philippines and comparative data from a number of Asian countries the book reveals that farmer tree growing has the potential to play a significant role in sustainable forest management and discusses the surrounding issues which must be addressed in order to realise this potential The book is primarily aimed at research scientists and graduate students interested in relevant aspects of forestry agroforestry agricultural diversity natural resource management and conservation in agricultural landscapes as well as those involved in sustainable development and international development studies It will also provide a valuable reference for professionals managers consultants policy makers and planners dealing with issues in sustainable development natural resource management land use change issues and participatory approaches to resource management   *New Vistas in Agroforestry* P. K. Ramachandran Nair,M.R. Rao,L.E. Buck,2013-03-09 It was in late 2002 that the idea of preparing a collection of multi authored chapters on different aspects of ag st forestry as a compendium for the 1 World Congress of Agroforestry June 2004 was tossed around With the approval of the idea by the Congress Organizing Committee serious efforts to make it a reality got under way in early 2003 The rigorously peer reviewed and edited manuscripts were submitted to the publisher in December 2003 Considering the many differentindividualsinvolved in the task as authors and manuscriptreviewers we feel quite pleased that the task could be accomplished within this timeframe We are pleased also about the contents on several counts First of all the tropical temperate mix of topics is a rare feature of a publication of this nature In spite of the scienti c commonalities between tropical and temperate practices of agroforestry the differences between them are so enormous that it is often impossible to mesh them together in one publication Secondly several of the chapters are on topics that have not been discussed or described much in agroforestryliterature A third feature is that some of the authors though well known in their own disciplinary areas are somewhat new to agroforestry the perceptions and outlooks of these scholars who are relatively unin uenced by the past happenings in agroforestry gives a whole new dimension to agroforestry and broadensthescopeofthesubject Finally ratherthanjustreviewingandsummarizingpastwork mostchapterstake the extra effort in attempting to outline the next steps   **Tree Planting** John Manvers Briscoe,1916   **Wood, Lumber and Timbers**

Weigand,2002 A quiet revolution is taking place in America s forests Once seen primarily as stands of timber our woodlands are now prized as a rich source of a wide range of commodities from wild mushrooms and maple sugar to hundreds of medicinal plants whose uses have only begun to be fully realized Now as timber harvesting becomes more mechanized and requires less labor the image of the lumberjack is being replaced by that of the forager This book provides the first comprehensive examination of nontimber forest products NTFPs in the United States illustrating their diverse importance describing the people who harvest them and outlining the steps that are being taken to ensure access to them As the first extensive national overview of NTFP policy and management specific to the United States it brings together research from numerous disciplines and analytical perspectives such as economics mycology history ecology law entomology forestry geography and anthropology in order to provide a cohesive picture of the current and potential role of NTFPs The contributors review the state of scientific knowledge of NTFPs by offering a survey of commercial and noncommercial products an overview of uses and users and discussions of sustainable management issues associated with ecology cultural traditions forest policy and commerce They examine some of the major social economic and biological benefits of NTFPs while also addressing the potential negative consequences of NTFP harvesting on forest ecosystems and on NTFP species populations Within this wealth of information are rich accounts of NTFP use drawn from all
