Trenchard Man Of Vision:

The Origins of Air War Robert F. Grattan, 2009-04-30 Air power has come to be seen as a country's first line of defence in the First World War views were vastly different Aircraft were a novelty not always welcomed by the traditionalist military and there were no tactics doctrine or strategies available for the deployment of air power Yet within four years proponents of the new force were making claims often extravagant of what aircraft could achieve Here Robert Grattan traces the remarkable history of the emergence of air power as a force to reckon with and its dramatic impact on military strategy He discusses the details of aircrafts their engines and manufacture including the Fokker Bristol Fighter the Zeppelin and the DH2 the weaponry and prominent figures such as Albert Ball and Werner Voss The First Air War is indispensable for military historians aviation and military enthusiasts as well as those interested in strategy *Sir Frederick Sykes and the Air Revolution 1912-1918* Lieutenant-Colonel Eric Ash, 2012-10-12 This is a long overdue study of Sir Frederick H Sykes Chief of the Air Staff of Britain's Royal Air Force RAF during the First World War Historians for the most part have either overlooked Sykes or misinterpreted him leaving a gap in the story of British flying Contrary to previous images of Sykes we now see that he was not a secretive intriguer or a tangential subject in RAF history Rather he played a fundamental part in organizing and leading British aviation from 1912 to the end of 1918 He provided organization visionary guidance and efficient administrative control for the fledgling service that tried to survive infancy in the heat of battle **Fledgling Eagle** Mark Andrews, 2008 From the days of the Royal Flying Corps in World War I military and political opinion was divided as to the role of aeroplanes in warfare Politics vested interests and personal antipathies all played a part in defining the development and structure of the newly formed RAF This military aviation book outlines the history of the RAF *Airwar* Phillip S. Meilinger, 2003 These essays cover a wide range of subjects and tell the story of air power's evolution over the past century **Air Force Magazine**, 2004 *C.P.C.*, 1946 *The Rise and Fall of the Singapore Naval Base, 1919-1942* William David McIntyre, 1979 *Books of the Month*, 1962 **Chasing the Wind** Kenneth Reid Van der Spuy, 1966 *The Leadership, Direction and Legitimacy of the RAF Bomber Offensive from Inception to 1945* Peter Gray, 2012-06-07 This book offers a fresh approach to the debate on the RAF's bomber offensive by using modern strategic leadership theory as an analytical tool to examine the campaign In particular it looks at the legality and legitimacy of the offensive and explores the key interfaces between the military leaders the politicians and allies It also looks at the major controversies in the aims and objectives of the campaign and the personalities involved Modern literature from the leadership field is used to consider the challenges facing those charged with the formulation and execution of the offensive Aspects of the senior leadership disputes are also dealt with in the context of the leadership literature and in the wider context of the strategic challenges then facing Churchill Sinclair and Portal A multi-disciplinary bent to the book enables the reader to move beyond the narrow confines of military considerations to the thorough investigation of the legality legitimacy and morality of the offensive [Aerospace](#)
