Trends In High Pressure Bioscience And Biotechnology:

Trends in High Pressure Bioscience and Biotechnology R. Hayashi, 2002-01-21 A world wide interest in the various aspects of high pressure in the field of biological science led to the First International Conference on High Pressure Bioscience and Biotechnology in Kyoto Japan High pressure bioscience encompasses the fields of food sciences pharmacy and medical fields and some high pressure techniques are used in the production of industrial products Moreover high pressure is a valuable tool for the study of natural macromolecules including biomembranes which are composed primarily of lipid and protein Many intermediate processes in the pressure induced protein unfolding have been discovered as a result This book covers the entire range of current high pressure bioscience and its possible applications *High-Pressure Bioscience and Biotechnology, Volume 1189* Douglas Hoyt Bartlett, Douglas H. Bartlett, 2010-03-29 The manipulation of biological materials using elevated pressure is providing an ever growing number of opportunities in both the applied and basic sciences Manipulation of pressure is a useful parameter for enhancing food quality and shelf life inactivating microbes viruses prions and deleterious enzymes affecting recombinant protein production controlling DNA hybridization and improving vaccine preparation In biophysics and biochemistry pressure is used as a tool to study intermediates in protein folding enzyme kinetics macromolecular interactions amyloid fibrous protein aggregation lipid structural changes and to discern the role of solvation and void volumes in these processes Biologists including many microbiologists examine the utility and basis of pressure inactivation of cells and cellular processes and conversely seek to discover how deep sea life has evolved a preference for high pressure environments This introduction and the papers that follow provide information on the nature and promise of the highly interdisciplinary field of high pressure bioscience and biotechnology HPBB Introduction

Advances in High Pressure Bioscience and Biotechnology Horst Ludwig, 1999-09-02 At present there is growing interest in high pressure bioscience and biotechnology The activities are nearly equally distributed between fundamental research and applications With original work on marine and terrestrial microbiology biochemistry molecular biology deep sea diving food science and other industrial applications this book covers the whole range of current high pressure bioscience Advances in High Pressure Bioscience and Biotechnology will be welcomed by all industrial and academic researchers who are working in this field
