Developing Skills and Competencies for Digital and Green Transitions Ordóñez de Pablos, Patricia, Almunawar, Mohammad Nabil, Anshari, Muhammad, 2023-08-29 In today's rapidly changing digital world, the need for education to keep pace with technology has never been more important. However, the traditional education system is struggling to adapt to these changes, and many students are not acquiring the digital skills and competencies needed to thrive in the current job market. At the same time, there is a growing need for sustainability and green education to address the pressing issues of climate change and create more resilient and inclusive societies. *Developing Skills and Competencies for Digital and Green Transitions* provides a persuasive solution to these pressing problems. By exploring the intersection of green education and digital technologies, this book offers a comprehensive approach to transforming education in the digital era. Through its innovative topics and methodologies, this book provides a platform for international collaboration, fostering the development of new digital technologies for education and accelerating innovation in educational technologies. It offers insights into how green education and advanced information technologies can be applied in the education sector to create more resilient, climate neutral and green economies and societies. With its focus on inclusiveness and sustainability, this book is a valuable resource for students, academics, policymakers and other stakeholders looking to build a more sustainable future.

The Circular Economy in the European Union Sepp Eisenriegler, 2020-09-23 The implementation of the circular economy will entail a major transformation from a resource destroying linear economy to a circular one that operates within the planet's regenerative boundaries. This book presents an interim assessment of the implementation of a circular economy in the EU. It reveals what achievements have been made in various EU institutions but which are scarcely perceived by the public, which basic scientific principles can be applied in this context and what NGOs are demanding beyond this progress. It provides convincing arguments for abandoning the hamster wheel of material based satisfaction of our needs and shows that the primacy of the economy stands in the way of a good life for all. Given its focus, it will appeal to everyone interested in an ecologically sustainable economic system.
