Feeding Each Other Michelle Auerbach, Nicole Civita, 2023-04-28 The global food system is sick and almost everyone knows it But this bold big hearted book doesn't stop at diagnosing the problem though it does that incisively and with style If a just more joyous future is possible it begins with the ideas in this book Joe Fassler food and environmental journalist and author of *Light the Dark Food* does much more than fuel our bodies Food helps us express care create culture and connect But while food today might feed some of us the growing producing packaging and distributing is also killing us Trying to feed the world is accelerating the collapse of environmental economic and social structures The current solutions aren't working By blending research insights from diverse thinkers and lived experience food systems educator Nicole Civita and story justice activist Michelle Auerbach make sense of sustenance They demonstrate that our lives depend on the relationships we make with and through food and make the case for a much needed cultural shift in the way we approach food

Power Switch Paul O'Brien, 2020-11-27 The bad news is that the world is in crisis the good news is that transformative activism can overcome it Will the more formal progressive institutions have the courage to go all in with that activism Ben Phillips author of *How to Fight Inequality* Is it actually possible that we might emerge from this pandemic with a peaceful global power switch from those who have too much to those who don't have

enough With billionaires able to decide the fate of nations private corporations more powerful and less accountable than ever and political autocrats around the world shaking our confidence in democratic institutions power resides in all the wrong places And so our world is in crisis In such moments activists find opportunities Not to restore the pre crises order but to transform it Paul O'Brien argues that progressive activists may never have a better opportunity to rewrite economic rules systems and outcomes in favor of those who don't have enough His book offers practical action steps for activists who want to drive a power switch that overcomes extreme inequalities in our world **Waste Not Everyday** Erin Rhoads,2019-07-01 All the tips tricks and motivation you need to transition to a less wasteful life **Big Data Science and Analytics for Smart Sustainable Urbanism** Simon Elias Bibri,2019-05-30 We are living at the dawn of what has been termed the fourth paradigm of science a scientific revolution that is marked by both the emergence of big data science and analytics and by the increasing adoption of the underlying technologies in scientific and scholarly research practices Everything about science development or knowledge production is fundamentally changing thanks to the ever increasing deluge of data This is the primary fuel of the new age which powerful computational processes or analytics algorithms are using to generate valuable knowledge for enhanced decision making and deep insights pertaining to a wide variety of practical uses and applications This book addresses the complex interplay of the scientific technological and social dimensions of the city and what it entails in terms of the systemic implications for smart sustainable urbanism In concrete terms it explores the interdisciplinary and transdisciplinary field of smart sustainable urbanism and the unprecedented paradigmatic shifts and practical advances it is undergoing in light of big data science and analytics This new era of science and technology embodies an unprecedentedly transformative and constitutive power manifested not only in the form of revolutionizing science and transforming knowledge but also in advancing social practices producing new discourses catalyzing major shifts and fostering societal transitions Of particular relevance it is instigating a massive change in the way both smart cities and sustainable cities are studied and understood and in how they are planned designed operated managed and governed in the face of urbanization This relates to what has been dubbed data driven smart sustainable urbanism an emerging approach based on a computational understanding of city systems and processes that reduces urban life to logical and algorithmic rules and procedures while also harnessing urban big data to provide a more holistic and integrated view or synoptic intelligence of the city This is increasingly being directed towards improving advancing and maintaining the contribution of both sustainable cities and smart cities to the goals of sustainable development This timely and multifaceted book is aimed at a broad readership As such it will appeal to urban scientists data scientists urbanists planners engineers designers policymakers philosophers of science and futurists as well as all readers interested in an overview of the pivotal role of big data science and analytics in advancing every academic discipline and social practice concerned with data intensive science and its application particularly in relation to sustainability [Empowering Climate Action in the United States](#) Tom Bowman,2021-01-29 An
