The 5x questions checklist for an effective hybrid workplace model

01 What do people want?

As mentioned above, a successful hybrid work strategy and hybrid workspace model can only work if it's designed for the people.

When making any significant decisions or investments, it's important to understand the preferences, needs, and expectations of the people who will be using the space. This includes employees, managers, and other stakeholders who will be part of their life.

The way to build a hybrid workspace is to first understand the needs of everyone, and then to design the space to meet those needs.

How do you design a hybrid workspace that meets the needs of everyone? It's not just about the physical space, but also about the experience of the people who will be using it. This includes the design of the space, the layout of the furniture, and the overall atmosphere of the office.
