**Guanxi and Local Green Development in China** Chunhong Sheng, 2019-06-19 This book examines the factors which contribute to local green development in China and employs political ecology to analyze the relationship between power and the environment Specifically it looks at which actors control access to resources and are therefore able to promote environmental progress Following the reform and opening up of China in the 1970s entrepreneurs and local officials profited economically and politically and formed close relationships known as guanxi in China As a result they have also been criticized as those responsible for the associated ecological damage This book does not contest this association but instead argues that the current literature places too much emphasis on their negative influence and the positive influence of their environmental work has been neglected Building on three case studies where local green development is being pursued Shanghai Pudong New Area Baoding and Wuning this book shows how local officials and entrepreneurs can also be the crusaders of a greener environment at the local level in China This book will be of great interest to students and scholars of Chinese studies with a particular interest in environmental policy and politics business and society as well as those interested in sustainable development more broadly

[Proceedings of the World Conference on Governance and Social Sciences 2025 \(WCGSS 2025\)](#) Muhammad Chaeroel Ansar, Andi Batara Al Isra, Dian Ekawaty, A.
