elements are highly interdependent and not separable in practice for analytical purposes we can treat them as distinct examining each from the perspective Of human agency and institutionalized properties From an agency point Of view human interaction involves the constitution and communication of meaning This is achieved via interpretive schemes or stocks of knowledge that humans draw on in their ongoing interaction with the world which form the core of mutual knowledge whereby an accountable universe of meaning is sustained through and in processes of interaction giddens The interpretive schemes however do more than merely enable shared meanings and hence mediate communication From the perspective of institutionalized properties interpretive schemes represent organizational structures of signification which represent the organizational rules that inform and define interaction Interpretive schemes are also reinforced or changed through social interaction as the organizational rules are reaffirmed or challenged through their use by human agents Thus in any interaction shared knowledge is not merely part of the background but is an integral part of the social encounter in part organizing it and in part being shaped by the interaction itself About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www forgottenbooks com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works *Management of Technology* Hans Jurgen Thamhain,2005 *Organization, Management and Technology in the Manufacture of Men's Clothing* Martin E.
