EC Competition and Telecommunications Law Andreas Bartosch, Jens-Daniel Braun, 2009-01-01 This new volume updates the groundbreaking analysis of its first edition in 2002 when the EC common regulatory framework for electronic

communications networks and services had just entered into force. So much has changed in the intervening years that this new edition bears little resemblance to its predecessor with every chapter either extensively altered or entirely new. It remains however the most detailed and comprehensive overview available of the application of the EC Treaty's competition rules in the markets for telecommunications and audiovisual media and of the applicable regulatory framework. In thirteen chapters each contributed by one or more noted legal authorities in the field, the second edition of *EC Competition and Telecommunications Law* covers the full range of EC telecommunications law across all major areas of both institutional and substantive law both on the international and EC levels including the following: State aid, the merger control regulation, justification for sector specific regulation in EC competition law, network access, authorizations and privileges and mobile telephony. Relevant EC media and communications law and relevant aspects of EC competition law are dealt with in detail. While some chapters focus on competition law, others deal primarily with sector specific regulation. There is practical guidance throughout on procedural matters alongside analysis of the substantive provisions. Well known in its first edition, this thoroughly revised and updated version continues to be vital reading for practitioners in particular those specializing in European competition law and for company and in-house lawyers who are seeking advice on how European law affects their business. As a detailed analysis of the basic legislative and regulatory framework of European telecommunications law, it will be an invaluable reference work for lawyers, judges, regulators and policymakers in all the EC Member States as well as for students and teachers of European law.

Telecommunications Law and Regulation in Nigeria Uchenna Jerome Orji, 2018-12-19. The Nigerian telecommunications industry has continued to grow in a phenomenal manner following market liberalization reforms that commenced in the 1990s. As of 2017, the telecommunications industry was one of the fastest growing economic sectors in Nigeria and the fourth largest contributor to the country's Gross Domestic Product. The telecommunications industry however remains a highly technical and naturally dynamic industry that has not been a usual area for legal research in developing countries such as Nigeria. This book bridges that gap in knowledge by providing an analysis of the legal and policy instruments that regulate the industry. It comprises eleven chapters that discuss the historical evolution of telecommunications and its regulation, the development of the Nigerian telecommunications industry from 1886 to 2017, the legal basis for the regulation of the industry, the licensing and duties of service providers, the regulation of network infrastructure, the protection of consumers, the regulation of competition, interconnection, universal access and environmental protection, and the resolution of industry disputes. This book will be useful to policy makers, legislators, regulators, lawyers, law students, investors, operators and consumers as well as any person interested in the Nigerian telecommunications industry.
