Moynihan and Samuel P Huntington Four structural areas are examined in each period the economy involvement in foreign affairs social movements and immigration What emerges is a narrative arc whereby immigration plays a clear and crucial role in shaping cultural stories of national identity as written by elite scholars These stories are represented in writings throughout all three periods and in such work we see the intellectual development and specification of the dominant narratives along with challenges to each Important conclusions include a keen reminder that identities are often formed along borders both external and internal that structure and culture operate dialectically and that national identity is hardly a monolithic static formation

Quester,J.J. Weltman,2012-12-06 The decade of the 1990s offers a chance to build a new and better international order What policy choices will this decade pose for the United States This wide ranging volume of essays imaginatively addresses these crucial issues The peaceful revolutions of 1989 1990 in the Soviet Union and Eastern Europe have swept away the foundations of the Cold War The Eastern European nations are free Europe is no longer divided Germany is united The Soviet threat to Western Europe is ending with the collapse of the Warsaw Pact and the withdrawals and asymmetrical cuts of Soviet forces And U S Soviet rivalry in the Third World is giving way to cooperation in handling conflicts as in Iraq and elsewhere Much of course remains uncertain and unsettled What sort of Soviet Union will emerge from the ongoing turmoil with what political and economic system and what state structure How far and how soon will the Eastern Euro pean states succeed in developing pluralist democracies and market economies Are the changes irreversible Certainly there will be turmoil backsliding and failures but a return to the Cold War hardly seems likely
