The Amundsen Photographs:

The Amundsen Photographs Roald Amundsen, Roland Huntford, 1987 Set in the context of Roald Amundsen's life and explorations with captions drawn from previously unpublished notes this photographic collection offers an unprecedented illustrated tour of Amundsen's unrivaled achievements in Arctic exploration

The Amundsen Photographs. Edited and Introduced by Roland Huntford Roland Huntford, 1987 *Uncertain Images: Museums and the Work of Photographs* Elizabeth Edwards, Sigrid Lien, 2016-02-17 Almost all museums hold photographs in their collections and museum professionals and their audiences engage with photographs in a myriad of ways Yet despite some three decades of critical museology and photographic theory and an extensive debate on the politics of representation outside art museums almost no critical attention has been given specifically to the roles purposes and lives of these photographs within museums This book brings into focus the ubiquitous yet entirely unconsidered work that photographs are put to in museums The authors argument is that there is an economy of photographs in museums which is integral to the processes of the museum and integral to the understanding of museums The international contributors drawn from curators and academics reflect a range of visual and museological expertise After an introduction setting out the range of questions and problems the first part addresses broad curatorial strategies and ways of thinking about photographs in museums Shifting the emphasis from curatorial practices and anxieties to the space of the gallery this is followed by a series of case studies of exhibitionary practices and the museum strategies that support them The third section focuses on the role of photographs in the museum articulation of difficult histories A final section addresses photograph collections in a digital environment New technologies and new media have transformed the management address and purposing in photographs in museums from cataloguing practices to streaming on social media These growing practices challenge both traditional hierarchies of knowledge in museums and the location of authority about photographs The volume emerges from PhotoCLEC a HERA funded project on museums and the photographic legacy of the colonial past in a postcolonial and multicultural Europe

Roald Amundsen's Sled Dogs Mary R. Tahan, 2019-01-04 This book is an analytical account of how Roald Amundsen used sledge dogs to discover the South Pole in 1911 and is the first to name and identify all 116 Polar dogs who were part of the Norwegian Antarctic Expedition of 1910-1912 The book traces the dogs from their origins in Greenland to Antarctica and beyond and presents the author's findings regarding which of the dogs actually reached the South Pole and which ones returned Using crewmember diaries reports and written correspondence the book explores the strategy methodology and personal insights of the explorer and his crew in employing canines to achieve their goal as well as documents the controversy and internal dynamics involved in this historic discovery It breaks ground in presenting the entire story of how the South Pole was truly discovered using animals and how deep and profound the differences of perception were regarding the use of canines for exploration This historic tale sheds light on Antarctic exploration history and the human nature relationship It gives

recognition to the significant role that animals played in this important part of history

The Image in Early Cinema Scott Curtis, Philippe Gauthier, Tom Gunning, Joshua Yumibe, 2018-03-22 In The Image in Early Cinema the contributors examine intersections between early cinematic form technology theory practice and broader modes of visual culture They argue that early cinema emerged within a visual culture composed of a variety of traditions in art science education and image making Even as methods of motion picture production and distribution materialized they drew from and challenged practices and conventions in other mediums This rich visual culture produced a complicated overlapping network of image making traditions innovations and borrowing among painting tableaux vivants photography and other pictorial and projection practices Using a variety of concepts and theories the contributors explore these crisscrossing traditions and work against an essentialist notion of media to conceptualize the dynamic interrelationship between images and their context

Photography and Exploration James R. Ryan, 2013-07-15 When Ferdinand Magellan set out to circumnavigate the globe in 1519 he wasn't able to bring a digital camera or a smartphone with him Yet as the eagerly awaited images from the Mars rover prove modern exploration is inconceivable without photography Since its invention in 1839 photography has been integral to exploration used by explorers sponsors and publishers alike and the early twentieth century advances in technology and photography's newfound cultural currency as a truthful witness to the world made the camera an indispensable tool In *Photography and Exploration* James R. Ryan uses a variety of examples from polar journeys to space missions to show how exploration photographs have been created circulated and consumed as objects of both scientific research and art Examining a wide range of photographs and expeditions Ryan considers how nations have often employed images as a means to scientific advancement or territorial conquest He argues that because exploration has long been bound up with the construction of national and imperial identity expeditionary photographs have often been used to promote claims to power especially by the West These images also challenge the way audiences perceive the world and their place within it Featuring one hundred images *Photography and Exploration* shines new light on how photography has shaped the image of explorers expeditions and the worlds they discovered
