**The Anti-Retirement Book** Robert E. Levinson, 2004 My feeling is that you should never retire In order to stay alive you should work until you die Successful and timely planning not for retirement but for rechargement is the main thrust of this book It will show you step by step how I did it along with dozens of intriguing case examples of others experience When The Anti Retirement Book does its job it will help you structure a plan tailored to your personal circumstances and needs that will as you get older make you more productive exciting and have fun filled years in the future You can design your own destiny on your own terms and within your own time frame This book is geared to people well in advance of the so called retirement age It makes it clear that the main problem for most people heading there is not financial At least equally important is how to occupy one s time in an organized way with productive physical and mental activity And most important how to plan well to make this happen Norman Mailer put it simply enough Boredom slays more of existence than war If boredom is retirement s arch enemy its antidote is diversity Studies bear out repeatedly that variety sparks interest and excitement It also presents the challenge of change Excerpted from [www.babyboomerseniors.com](http://www.babyboomerseniors.com) review by Anita Finley Many Years ago I met Robert Levinson and was quite impressed with him and the powerful influence he had in his community of Boca Raton After he wrote this book I knew why I admired him so much This is his philosophy My feeling is that you should never retire In order to stay alive you should work until you die In writing the retirement book Bob approaches the project with missionary zeal It has long depressed me Levinson says to see so many fine people who could be happily and productively employed wasting what could be the best years of their lives This in a nutshell is the basic theme of the book Bob s vast experience qualifies him to review assess and help readers tailor to their personal needs and desires the wealth of fruitful options accessible Bob Levinson is a management and marketing specialist But more than that he is a

RETIREMENT specialist When you get the urge he believes follow it This explains why he has many careers Excerpted from a column by Humberto Georgina Cruz Driving from Vero Beach to Port Everglades to go on a cruise we had only 30 minutes to stop in Boca Raton and see Robert Levinson at Lynn University as he talked his brown eyes gleaming we could sense he was right in his element feeling just enough pressure to get a thrill out of it I've talked to doctors about this In order to live a good life you must always have a degree of pressure on you said Levinson who at 78 he turns 79 on Friday has served as a vice president of the Boca Raton school for more than 12 years What Levinson refers to as pressure other people might simply call structure or having a specific activity at a specific time And many retirees may find enjoyment in leisure activities and hobbies Levinson doesn't much care about But none of this takes away from the wisdom of his advice Always be thinking of what you'll do next including when you reach the traditional retirement age Even if it isn't work know what it is you want to do or you may find yourself without a reason for living The Age of Longevity Rosalind C. Barnett, Caryl

Rivers, 2016-08-22 Long productive lives are the destiny of most of us not just the privilege of our great grandchildren The story of aging is not one of steady decline and decay we need a new narrative based on solid research not scare stories Today Americans enjoy a new healthy stage of life between roughly 65 and 79 during which we are staying engaged in the workplace starting new relationships and careers remaining creative and becoming entrepreneurs and job creators We are in the midst of a major paradigm shift in the way we live Our major milestones are shifting The definition of normal behavior is changing Today we marry later or not at all cohabitation is not just a stepping stone to marriage but a long term arrangement for many Women often have their first child in their 40s and increasingly before they marry People enjoy active sex lives well into their 6th 7th or even 8th decades None of our institutions will remain the same People are working longer and given the declining birth rate older workers will be in great demand Four generations are increasingly working side by side learning from each other But we must ensure that the benefits of long life are not limited to a wealthy few The Age of Longevity shows how we as a society can embrace the life altering changes that are either coming in the near future or are already underway The authors give readers a panoramic view of how they the institutions that affect them and the country as a whole will need to adapt to what's ahead They offer strategies based on cutting edge research that will enable individuals institutions companies and governments to make the most of our lengthening life spans Using real life examples throughout the authors paint a picture of what our new longer lives will look like and the changes that need to be made so we can all make those years both more productive and more enjoyable **The Anti-Apartheid Act of 1985** United States.
