Meeting the Need Craig Bethel, North Carolina State University, 2010 **Democratic Architecture** Donald

MacDonald, 2015 Democratic Architecture offers viable affordable solutions to our country's ongoing housing problems. The book deals with tough urban problems and raises questions not just about housing policy but about larger political and ethical issues as well. It provides a critique of the various approaches to post-war housing and then puts forth a number of innovative solutions to the problem. Many of the proposals are practical designs for low and lower middle income housing with an emphasis on increasing opportunities for home ownership. They include a variety of detached homes, multi-unit buildings and some alternative types of housing for people whose lifestyles diverge from the mainstream. With more than 200 black, white and color illustrations, Democratic Architecture is a book that clearly lays out solutions to housing crises that we see occurring all too often in the United States and all over the world.

Housing the Nation Alexander Gorlin, Victoria Newhouse, 2024-03-26. Scholars, advocates and architects assess America's affordable housing crisis and suggest various strategies to rectify it, including numerous images of important recently built houses and complexes. On any given night more than 650,000 people in the United States, many with families and full-time jobs, experience homelessness. The shortfall in affordable housing is estimated to be 5 million units or more. Devastating effects of these conditions include an increase in multigenerational poverty, a decrease in economic mobility and, since the housing crisis has a disproportionate impact on communities of color, a heightening of racial injustice. Just as there was no single cause of the crisis, there is no single cure. Assembled here are essays by economists, scholars, architects, planners and community organizers to address diverse aspects of the subject. The book discusses the history and extent of the US housing crisis, permanent affordable housing and affordable housing as a component of market-rate residential buildings, the development of community associations that can build and manage local units, links between housing production and climate change and the pervasive and long-term consequences of racial discrimination in the housing market. Recent buildings by Studio Gang, Koning Eizenberg Architecture and others illustrate affordable housing at its best, offering a glimpse of possible solutions. Included are essays by Dean Baker, Richard Florida, Robert Kuttner, Michael Gecan, Rosanne Haggerty, J. Phillip Thompson, Margery Perlmutter, David Dante Troutt, Justin Steil, Christopher Hawthorne, David Burney, Jon McMillan, Viren Brahmbhatt, Richard Plunz, Kenneth Frampton, Mark Ginsberg, Fernando Pagés Ruiz, Jessica Holmes, Rusty Smith, Andrés Duany, Alan Organschi, Andrew Ruff and Elizabeth Gray. This book is Flexibound.

A Decent Home Alan Mallach, 2020-06-29. What is a decent home? Does it simply provide shelter from the elements? Is it affordable enough that you can buy the other necessities of life? Does it connect you to a community with adequate social and economic resources? Noted housing expert Alan Mallach turns his decades of experience to these

questions in A Decent Home Mallach's nuanced analysis of housing issues critical to communities across the country will help planners evaluate the housing situation in their own communities and formulate specific plans to address a variety of housing problems. The book is both a practical step-by-step guide to developing affordable housing and a sophisticated introduction to housing policy. Chapters address design, site selection, project approval, financing, and the history of housing policy in the United States. Planners will find useful information about inclusionary and exclusionary zoning, affordable housing preservation, and the risks and rewards of affordable home ownership programs. Mallach also connects the dots among regional economic competitiveness, quality of life, community revitalization, and affordable housing.

The Changing Image of Affordable Housing Dr. Ulduz Maschaykh, 2015-05-29. This book examines the liveability and affordability of twenty-first century residential architecture. Focussing on the architects and communities' commitment to these housing programmes, as well as that of the private building sector, it stresses the importance of the context of the neighbourhoods in which they are placed, which are either in the process of urban transition or already gentrified. In doing so, the book shows how and to what extent twenty-first century dwelling architecture developments can help to create an integrated sense of community, diminish social and demographic exclusions in a neighbourhood, and incorporate people's desires as to what their buildings should look like.

Housing as Intervention Karen Kubey, 2018-08-28. Across the world, the housing crisis is escalating. Mass migration to cities has led to rapid urbanisation on an unprecedented scale, while the withdrawal of public funding from social housing provision in Western countries and widening income inequality have further compounded the situation. In prosperous US and European cities, middle and low-income residents are being pushed out of housing markets increasingly dominated by luxury investors. The average London tenant, for example, now pays an unaffordable 49 per cent of his or her pre-tax income in rent. Parts of the developing world and areas of forced migration are experiencing insufficient affordable housing stock, coupled with rapidly shifting ways of life. In response to this context, forward-thinking architects are taking the lead with a collaborative approach. By partnering with allied fields, working with residents, developing new forms of housing, and leveraging new funding systems and policies, they are providing strategic leadership for what many consider to be our cities' most pressing crisis. Amidst growing economic and health disparities, this issue of AD asks how housing projects and the design processes behind them might be interventions towards greater social equity and how collaborative work in housing might reposition the architectural profession at large.
