The Architecture Of Castles A Visual Guide:

The Architecture of Castles Reginald Allen Brown, 1984 Castles in Medieval Society Charles Coulson, 2004 In this challenging new book Charles Coulson overturns many of the traditional assumptions about the nature and purpose of castle building in the middle ages He demolishes the traditional belief that castles were overwhelmingly military in their function showing how this was simply one aspect of a more complicated whole He sets out to recreate the medieval understanding of castles as symbolically fortified places of all kinds from ancient walled post Roman towns and prestigious religious enclaves to transitory campaign forts Going back to the original sources Dr Coulson proposes a new and more subtle understanding of the function and symbolism of castles as well as vivid insights into the lives of the people who inhabited them Fortresses were only occasionally caught up in war but constantly were central to the ordinary life of all classes of the nobility and gentry of widows and heiresses of prelates and clergy of peasantry and townspeople alike Castles in Medieval Society presents and explores this broad social panorama The Architecture of Castles Reginald Allen Brown, 1984 An illustrated concise account of the development and decline of castle architecture this discusses the great variety in style strength and location of castles Examining castles both as fortresses in times of war and as residences the author concentrates on eight castles which represent the apogee of medieval fortification and describes the famous sieges of Rochester Kenilworth and Bedford R Allen Brown has written several standard texts on castles and a number of guidebooks on individual castles

Cultural Difference and Material Culture in Middle English Romance Dominique Battles, 2013-09-13 This book explores how the cultural distinctions and conflicts between Anglo Saxons and Normans originating with the Norman Conquest of 1066 prevailed well into the fourteenth century and are manifest in a significant number of Middle English romances including King Horn Havelok the Dane Sir Orfeo Sir Gawain and the Green Knight and others Specifically the study looks at how the material culture of these poems architecture battle tactic landscapes systematically and persistently distinguishes between Norman and Anglo Saxon cultural identity Additionally it examines the influence of the English Outlaw Tradition itself grounded in Anglo Saxon resistance to the Norman Conquest as expressed in specific recurring scenes disguise and infiltration forest exile found in many Middle English romances In the broadest sense a significant number of Middle English romances including some of the most well read and often taught set up a dichotomy of two ruling houses headed by a powerful lord who compete for power and influence This book examines the cultural heritage behind each of these pairings to show how poets repeatedly contrast essentially Norman and Anglo Saxon values and ruling styles **All Things Medieval** Ruth A. Johnston, 2011-08-15 This insightful survey of the things of medieval Europe allows modern readers to understand what they looked like what they were made of how they were created and how they were used All Things Medieval An Encyclopedia of the Medieval World covers the widest definition of medieval Europe possible not by covering history in the traditional textbook manner of listing wars leaders and significant historic events but by presenting

detailed alphabetical entries that describe the artifacts of medieval Europe By examining the hidden material culture and by presenting information about topics that few books cover pottery locks and keys shoes weaving looms barrels toys pets ink kitchen utensils and much more readers get invaluable insights into the nature of life during that time period and area The heartland European regions such as England France Italy and Germany are covered extensively and information regarding the objects of regions such as Byzantium Muslim Spain and Scandinavia are also included For each topic of material culture the entry considers the full scope of the medieval period roughly 500 1450 to give the reader a historical perspective of related traditions or inventions and describes the craftsmen and tools that produced it *Welsh Castle Builders* John Marshall,2022-12-02 The Edwardian castles of north Wales were built by a Savoyard master mason but also by many other artisans from Savoy What is more extraordinary is that the constables of Flint Rhuddlan Conwy and Harlech were also Savoyards the Justiciar and Deputy Justiciar at Caernarfon were Savoyards and the head of the English army leading the relief of the sieges of Flint and Rhuddlan was a future Count of Savoy The explanatory story is fundamentally of two men the builder of castles Master James of St George and Justiciar Sir Othon de Grandson and the relationship of these two men with King Edward I But it is also the story of many others a story that begins with the marriage of Alianor de Provence to Edward s father Henry III and the influx of her kinsmen to England such as Pierre de Savoie It is impossible to understand the development of the castles in north Wales without an understanding of the Savoyards where they came from and their impact on English and Welsh history The defining work of Arnold Taylor in exploring the Savoyard history of Welsh castles is now many years past and mostly out of print it is time for the story to be revisited and expanded upon in the light of new evidence
