The Architect, 1890 ECAI 2023 Kobi Gal, Ann Nowé, Grzegorz J. Nalepa, Roy Fairstein, Roxana Radulescu, 2023-10-15 Artificial intelligence or AI now affects the day to day life of almost everyone on the planet and continues to be a perennial hot topic in the news This book presents the proceedings of ECAI 2023 the 26th European Conference on Artificial Intelligence and of PAIS 2023 the 12th Conference on Prestigious Applications of Intelligent Systems held from 30 September to 4 October 2023 and on 3 October 2023 respectively in Krak w Poland Since 1974 ECAI has been the premier venue for presenting AI research in Europe and this annual conference has become the place for researchers and practitioners of AI to discuss the latest trends and challenges in all subfields of AI and to demonstrate innovative applications and uses of advanced AI technology ECAI 2023 received 1896 submissions a record number of which 1691 were retained for review ultimately resulting in an acceptance rate of 23% The 390 papers included here cover topics including machine learning natural language processing multi agent systems and vision and knowledge representation and reasoning PAIS 2023 received 17 submissions of which 10 were accepted after a rigorous review process Those 10 papers cover topics ranging from fostering better working environments behavior modeling and citizen science to large language models and neuro symbolic applications and are also included here Presenting a comprehensive overview of current research and developments in AI the book will be of interest to all those working in the field

Hands-on Deep Learning Tanvir Islam, 2026-01-01 This book is designed for data scientists and machine learning engineers who are keen to dive deep into the complexities of deep learning The book is particularly useful for professionals in industries where machine learning is applied It serves as a comprehensive guide for those eager to explore and expand their knowledge in this domain The book caters to aspirational practitioners those who are enthusiastic about the field of deep learning in general being also suitable for engineers and data scientists who are preparing for machine learning interviews Furthermore undergraduate and graduate students who possess a basic understanding of machine learning will find this book to be a valuable resource Learning to create deep learning algorithms from scratch provides a deeper understanding of the underlying principles and mechanics which can be beneficial in customizing and optimizing models for specific tasks As such this book will allow the

readers to innovate creating new architectures or techniques beyond what existing libraries offer Moreover it fosters a problem solving mindset as the learner navigates through the challenges of implementing complex algorithms This knowledge will help readers and learners to debug and improve models using pre built libraries The author goes beyond just explaining the theory of deep learning connecting theoretical ideas to their real world implementations and dives into how the theoretical aspects of deep learning can be applied in real world scenarios Through hands on examples and case studies the author demonstrates the application of deep learning principles in solving problems across diverse domains like computer vision natural language processing and business analytics

Noman,2020-05-20 This book delivers the state of the art in deep learning DL methods hybridized with evolutionary computation EC Over the last decade DL has dramatically reformed many domains computer vision speech recognition healthcare and automatic game playing to mention only a few All DL models using different architectures and algorithms utilize multiple processing layers for extracting a hierarchy of abstractions of data Their remarkable successes notwithstanding these powerful models are facing many challenges and this book presents the collaborative efforts by researchers in EC to solve some of the problems in DL EC comprises optimization techniques that are useful when problems are complex or poorly understood or insufficient information about the problem domain is available This family of algorithms has proven effective in solving problems with challenging characteristics such as non convexity non linearity noise and irregularity which dampen the performance of most classic optimization schemes Furthermore EC has been extensively and successfully applied in artificial neural network ANN research from parameter estimation to structure optimization Consequently EC researchers are enthusiastic about applying their arsenal for the design and optimization of deep neural networks DNN This book brings together the recent progress in DL research where the focus is particularly on three sub domains that integrate EC with DL 1 EC for hyper parameter optimization in DNN 2 EC for DNN architecture design and 3 Deep neuroevolution The book also presents interesting applications of DL with EC in real world problems e g malware classification and object detection Additionally it covers recent applications of EC in DL e g generative adversarial networks GAN training and adversarial attacks The book aims to prompt and facilitate the research in DL with EC both in theory and in practice The Americana ,1914 **Architecture and Building** ,1917 **The Builder** ,1914
