Through The Vanishing Point Space In Poe:

Wealth of Shenanigans: The Tactile Underbelly of Concept Gary Van Den Heuvel, 2016-12-07 Gary Van Den Heuvel was born on a dairy farm in western Wisconsin and he epitomized the independence of mind humor earthiness and pragmatism of a working class rural life For most of his life he worked as a solitary independent scholar and as a result his penetrating vision is virtually unknown by the larger world Gary possessed a brilliant and insightful philosophical mind that wrestled constantly and fruitfully with the great challenges of our time The present book synthesizes his vision by combining memoir essay Joycean irrationality and spiritual insight It illuminates how an understanding of touch as the foundation of mind can shift how we live Engaging with his ideas can help us better face the serious challenges of our current situation through a radical shift in our philosophical paradigm Van Den Heuvel also abridged his hero Susanne K Langer's three volume masterwork *Mind An Essay on Human Feeling* for The Johns Hopkins University Press which published it in 1988

Marshall McLuhan's Mosaic Elena Lamberti, 2012-01-01 One hundred years after Marshall McLuhan's birth Elena Lamberti explores a fundamental yet neglected aspect of his work the solid humanistic roots of his original mosaic form of writing In this investigation of how his famous communication theories were influenced by literature and the arts Lamberti proposes a new approach to McLuhan's thought Lamberti delves into McLuhan's humanism in light of his work on media and culture exploring how he began to perceive literature not just as a subject but a function inseparable from communal existence Lamberti pays particular attention to the central role played by Modernism in the making of his theories including the writings of Ford Madox Ford James Joyce Ezra Pound and Wyndham Lewis Reconnecting McLuhan with his literary past Marshall McLuhan's *Mosaic* is a demonstration of one of his greatest ideas that literature not only matters but can help us understand the hidden patterns that rule our environment

Writing the Structures of the Subject Will Greenshields, 2017-03-07 This book examines and explores Jacques Lacan s controversial topologisation of psychoanalysis and seeks to persuade the reader that this enterprise was necessary and important In providing both an introduction to a fundamental component of Lacan s theories as well as readings of texts that have been largely ignored it provides a thorough critical interpretation of his work Will Greenshields argues that Lacan achieved his most pedagogically clear and successful presentations of his most essential and notoriously complex concepts such as structure the subject and the real through the deployment of topology The book will help readers to better understand Lacan and also those concepts that have become prevalent in various intellectual discourses such as contemporary continental philosophy politics and the study of ideology and literary or cultural criticism
