Travels With A Primate:

Travels with a Primate Terry Waite, 2019-02-21 This is Terry as he really is wise and funny A good book from a big man If only he could be the Primate John Sergeant A travelogue that is refreshingly irreverent and deeply human James Naughtie From darkest Africa to the darker and infinitely wetter birthplace of John Knox from the remote expanse of the Alaska Highway to part of the Antipodes that even Bill Bryson could not reach Terry Waite takes us on a guided world tour in the company of Dr Robert Runcie Even an archbishop has little control over wars and missed connections floods and food poisoning But this Primate sailed majestically through the most troubled of waters as his companions including Chaplain Richard Chartres baled energetically in his wake Hilarious and affectionate Travels with a Primate offers an unashamedly nostalgic return to the 1980s It is a delightful tribute to enduring friendship

Travels with a Primate Terry Waite, 2010
Chimpanzee Travels Dale Peterson, 2003 A lifelong fascination with primates led Dale Peterson to Africa which he crisscrossed in hope of sighting chimpanzees in the wild As with any adventure worth retelling however Peterson's detours are as notable as his destinations With the good natured fatalism of the tested traveler Peterson tells of trains and riverboats opportunists and ecotourists rain forests and shantytowns as he conveys the pitfalls of going forth on a budget as tiny as the continent is vast Along the way we also meet Jane Goodall and several other renowned primate researchers and caretakers This is travel writing with a purpose an account that inspires both admiration and concern for Africa's people places and natural diversity

Adaptive Radiations of Neotropical Primates Marilyn A. Norconk, Alfred L. Rosenberger, Paul A. Garber, 2011-06-28 This collection of 29 papers grew out of a symposium entitled Setting the Future Agenda for Neotropical Primates The symposium was held at the Department of Zoological Research National Zoological Park Washington D C on February 26 27 1994 and was sponsored by the Wenner Gren Foundation for Anthropological Research Smithsonian Institution and Friends of the National Zoo We put the symposium together with two objectives to honor Warren G Kinzey for his contributions to the

growing field of platyrrhine studies and to provide researchers who work in the Neotropics with the opportunity to discuss recent developments to identify areas of research that require additional study and especially to help guide the next generation of researchers. The symposium provided the opportunity to recognize Warren as a mentor and collaborator to the contribution of the study of platyrrhines. Contributions to the book were expanded in order to provide a more comprehensive view of platyrrhine evolution and ecology to emphasize the interdisciplinary nature of many of these studies and to highlight the central role that New World monkeys play in advancing primatology. If this volume were to require major revisions after just one more decade of research that would be a fitting testament to Warren's enthusiasm and his drive to continually update the field with new ideas and methods. Tributes to Warren and a list of his publications have been published elsewhere.

Lambert, Margaret A. H. Bryer, Jessica M. Rothman, 2024-07-26 Exploring everything from nutrients to food acquisition and research methods a comprehensive synthesis of the study of diet and feeding in nonhuman primates. What do we mean when we say that a diet is nutritious? Why can some animals get all the energy they need from eating leaves while others would perish on such a diet? Why don't mountain gorillas eat fruit all day as chimpanzees do? Answers to these questions about food and feeding are among the many tasty morsels that emerge from this authoritative book. Informed by the latest scientific tools and millions of hours of field and laboratory work on species across the primate order and around the globe, this volume is an exhaustive synthesis of our understanding of what, why, and how primates eat. State-of-the-art information presented at physiological, behavioral, ecological, and evolutionary scales will serve as a road map for graduate students, researchers, and practitioners as they work toward a holistic understanding of life as a primate and the urgent conservation consequences of diet and food availability in a changing world. **Travels of Fray Sebastián Manrique, 1629-1643** Sebastião Manrique, 1926 **The Deluge and the Ark** Dale Peterson, 1989 An account of Peterson's journey as he searched the world for endangered primates and discovered the major environmental problems facing the earth. **The Life and Travels of George Whitefield, M.
