Thinking through Children's Literature in the Classroom Agustín Reyes-Torres, Luis S. Villacañas-de-Castro, Betlem Soler Pardo, 2014-06-30 This book is the result of understanding literature as a central part of children's education Fiction and nonfiction literary works constitute a source to open young minds and to help them understand how and why people themselves included live as they do or to question through critical lenses whether they could live otherwise By integrating philological cultural and pedagogical inquiries Thinking through Children's Literature in the Classroom approaches the use of literature as a crucial factor to motivate students not only to improve their literacy skills but also to develop their literary competence one that prepares them to produce independent and sensible interpretations of the world Of course the endeavor of forming young readers and fostering their ability to think begins primarily by having well read teachers who are enthusiastic about teaching and secondly by having students who are willing to learn To encourage and sustain them through the critical turns of their own thinking processes educators must surely display a sound pedagogic knowledge apart from deep literary expertise

Why Gender Matters Leonard Sax, M.D., Ph.D., 2007-12-18 Are boys and girls really that different Twenty years ago doctors and researchers didn't think so Back then most experts believed that differences in how girls and boys behave are mainly due to differences in how they were treated by their parents teachers and friends It's hard to cling to that belief today An avalanche of research over the past twenty years has shown that sex differences are more significant and profound than anybody guessed Sex differences are real biologically programmed and important to how children are raised disciplined and educated In Why Gender Matters psychologist and family physician Dr Leonard Sax leads parents through the mystifying world of gender differences by explaining the biologically different ways in which children think feel and act He addresses a host of issues including discipline learning risk taking aggression sex and drugs and shows how boys and girls react in predictable ways to different situations For example girls are born with more sensitive hearing than boys and those differences increase as kids grow up So when a grown man speaks to a girl in what he thinks is a normal voice she may hear it as yelling Conversely boys who appear to be inattentive in class may just be sitting too far away to hear the teacher especially if the teacher is female Likewise negative emotions are seated in an ancient structure of the brain called the amygdala Girls develop an early connection between this area and the cerebral cortex enabling them to talk about their feelings In boys

these links develop later So if you ask a troubled adolescent boy to tell you what his feelings are he often literally cannot say Dr Sax offers fresh approaches to disciplining children as well as gender specific ways to help girls and boys avoid drugs and early sexual activity He wants parents to understand and work with hardwired differences in children but he also encourages them to push beyond gender based stereotypes A leading proponent of single sex education Dr Sax points out specific instances where keeping boys and girls separate in the classroom has yielded striking educational social and interpersonal benefits Despite the view of many educators and experts on child rearing that sex differences should be ignored or overcome parents and teachers would do better to recognize understand and make use of the biological differences that make a girl a girl and a boy a boy
