Treatise On Basic Philosophy:

Treatise on Basic Philosophy Mario BUNGE,1989-07-31 The purpose of this Introduction is to sketch our approach to the study of value morality and action and to show the place we assign it in the system of human knowledge 1 VALUE MORALITY AND ACTION FACT THEORY AND METATHEORY We take it that all animals evaluate some things and some processes and that some of them learn the social behavior patterns we call moral principles and even act according to them at least some of the time An animal incapable of evaluating anything would be very short lived and a social animal that did not observe the accepted social behavior patterns would be punished These are facts about values morals and behavior patterns they are incorporated into the bodies of animals or the structure of social groups We distinguish then the facts of valuation morality and action from the study of such facts This study can be scientific philosophic or both wayan animal evaluates environmental A zoologist may investigate the or internal stimuli a social psychologist may examine the way children learn or fail to learn certain values and norms when placed in certain environments And a philosopher may study such descriptive or explan atory studies with a view to evaluating valuations moral norms or behavior patterns he may analyze the very concepts of value morals and action as well as their cognates or he may criticize or reconstruct value beliefs moral norms and action plans Treatise on Basic Philosophy: Volume 7 Mario BUNGE,1985-07-31 Treatise on Basic Philosophy Mario BUNGE,1979-04-30 Treatise on Basic Philosophy Mario Augusto Bunge,1977 Treatise on Basic Philosophy M. Bunge,2012-12-06 In this Introduction we shall sketch the business of ontology or metaphysics and shall locate it on the map of learning This has to be done because there are many ways of construing the word ontology and because of the bad reputation metaphysics has suffered until recently a well deserved one in most cases 1 ONTOLOGICAL PROBLEMS Ontological or metaphysical views are answers to ontological ques tions And ontological or metaphysical questions are questions with an extremely wide scope such as Is the world material or ideal or perhaps neutral Is there radical novelty and if so how does it come about Is there objective chance or just an appearance of such due to human ignorance How is the mental related to the physical Is a community anything but the set of its members and Are there laws of history Just as religion was born from helplessness ideology from conflict and technology from the need to master the environment so metaphysics just liketheoretical science was probably begotten by the awe and bewilderment at the boundless variety and apparent chaos of the phenomenal world i e the sum total of human experience Like the scientist the metaphysician looked and looks for unity in diversity for pattern in disorder for structure in the amorphous heap of phenomena and in some cases even for some sense direction or finality in reality as a whole *Treatise on Basic Philosophy* Mario BUNGE,1974-12-31 In this Introduction we shall sketch a profile of our field of inquiry This is necessary because semantics is too often mistaken for lexicography and therefore dismissed as trivial while at other times it is disparaged for being concerned with reputedly shady characters such as meaning and allegedly defunct ones like truth Moreover our special concern the semantics of science is a

newcomer at least as a systematic body and therefore in need of an introduction | GOAL Semantics is the field of inquiry centrally concerned with meaning and truth It can be empirical or nonempirical When brought to bear on concrete objects such as a community of speakers semantics seeks to answer problems concerning certain linguistic facts such as disclosing the interpretation code inherent in the language or explaining the speakers ability or inability to utter and understand new sentences of the language This kind of semantics will then be both theoretical and experimental it will be a branch of what used to be called behavioral science
