## The 5x questions checklist for an effective hybrid workplace model

01

What do people want?

As mentioned above, a successful hybrid work strategy and hybrid workplace model can only work if it is designed for the people.

Before making any significant decisions or investments, it is important to understand the preferences, needs, and expectations of the employees, their families, and the employees who would also be part of their life.

The way to build a hybrid work model is to first understand the needs of the employees and their families, and then design the model to meet those needs.

How do you design a hybrid work model that meets the needs of the employees and their families? The answer is to design a model that is flexible, adaptable, and responsive to the needs of the employees and their families.
