Study Skills Program Level 1:

The HM Learning and Study Skills Program Judy Tilton Brunner, Matthew S. Hudson, 2013-11-21 The HM Learning and Study Skills Program Level II was designed to provide an introduction to learning and study skills for 8th, 9th, and 10th grade students through a series of activity-oriented units. The Level II Teacher's Guide includes a pretest, a wide variety of teaching suggestions, unit summaries, activities for retrieval and closure, as well as teaching adaptations through the use of technology. It was published to help teachers assist students in the development of essential study skills and to reinforce their existing strategies that work. It is structured on the assumption that an activity-oriented lesson is the most effective instructional strategy for the teaching of study skills. Or more succinctly, that learning by doing is the best way to study smart.

Resources in Education, 1985 **Study Skills** Anne Thomas, 1993 *HM Science Study Skills Program* Carol Wilson, Gary Krasnow, 1983 This program includes 14 activity-oriented units which integrate instruction in science study skills with hands-on learning about energy and appropriate technology. The program is suitable for use in a wide range of science curricula in grades 7 to 10. Units focus on such topics as the meaning of the word appropriate, what makes technology appropriate, non-renewable and renewable energy, technology and the environment, using energy efficiently, life cycle costing, the solar greenhouse, storing energy, conserving energy, and solar and wind collectors. The final unit is a class project which permits students to use many of the skills they have learned. These skills include listening, building science vocabulary, reading for meaning, taking effective notes, making judgments, interpreting charts and graphs, problem solving, test taking, using scientific measuring tools, applying laws, working with the metric system, working in scientific notation, and developing and testing hypotheses. This teacher's guide, which includes facsimiles of all pages in the student text, includes instructional strategies and practical suggestions for both the experienced and inexperienced teacher. Study Skills Program Judy Tilton Brunner, Matthew S. Hudson, 2014 Level I Grades 5-7 Young adolescents have different developmental needs than other students. The HM Learning and Study Skills Program is geared for specific grade levels, allowing you to encourage the middle and junior high student's growing capacity for abstraction. At the same time, the activity-oriented structure keeps their attention. Students will learn to harness their particular learning style in a way that best suits their needs. Each student workbook teaches and reinforces the essential skills students need to be successful: skills for perceiving, organizing, making sense of, and using ideas and data. The workbook functions as a text for learning study skills and as a reference resource throughout the year. Remember, learning and study skills are not substitutes for hard work. However, by following the suggestions within this workbook, students will develop the skills to use their time and energy more efficiently. *Bulletin of the Department of Elementary School Principals* National Education Association of the United States.
