Cornelius Adebahr

Target Europe:

Europe and Iran Cornelius Adebahr, 2017-04-21 The EU's approach to Iran has emerged as one of the few successes of European foreign policy. Still, its role in international negotiations from 2003 as much as its broader approach to Iran are generally poorly appreciated by policy makers in Europe, the United States, and around the world. This book aims to explain the specifics of the EU's approach to Iran, taking into account both the complexity of European foreign policy in particular within transatlantic relations and Iran's aspired place in the international order. It informs the reader about the special negotiation format that included a number of world powers as well as multilateral bodies such as the International Atomic Energy Agency (IAEA) and the UN Security Council. Furthermore, it provides an outlook on European post-nuclear deal strategies and offers conclusions on the effectiveness of Europe's multilateral approach to foreign policy. By looking at the EU's diplomatic activities towards Iran over more than a decade, the book focuses on Europe's actorness in international politics. This text will be of key interest to scholars, students, and practitioners involved or interested in the European Union, Iran, U.S. foreign policy, as well as Foreign and Security policy, including sanctions policy, and more broadly to European Politics, Middle East studies, and international relations.

Cross-border Mergers and Acquisitions O. Morresi, A. Pezzi, 2014-11-19 Since their explosion in the mid-1990s, mergers and acquisitions (MAs) have turned into a global phenomenon with growing prevalence. A large number of theoretical and empirical studies focus on cross-border deals from several perspectives such as motives, strategic issues, and performance. Most books treat these studies as specific characteristics of MAs, paying little attention to the distinctive elements that differentiate them from domestic operations. In short, there is now a real need for a fresh review and categorization of cross-border deals. *Cross-Border Mergers and Acquisitions* is the first book to provide readers with a complete guide to understanding the main concepts, theories, and results driving cross-border MAs. Morresi and Pezzi present an original framework that ties together the growing body of theoretical and empirical studies on the topic. This work describes the relevance of the phenomenon in terms of its economical, geographical, and historical impact and analyzes the market and accounting-based performance of cross-border deals.

Politics of Debt and Europe's Relations with the 'South' Nygard Stefan Nygard, 2020-07-31 An annual collection of the best research on European and global themes, the *Annual of European and Global Studies* publishes issues with a specific focus, each addressing critical developments and controversies in the field. Combines a discussion of the multi-layered European and global North-South divide with an effort to retrieve alternatives to the dominant divisive use of debt as staking out claims against another party. Explores the consequences of the erasure of historical temporality in the recent period of globalization and individualization, as well as new registers for political uses of the past under current conditions. Draws on socio-political, moral, philosophical, and literary/artistic analyses tracing the genealogy of debt through European history. Focusing on Europe in a global context to offer critical historical and philosophical perspectives on debt and guilt. Debt enables individuals and

collectives to function and to expand their space of manoeuvre but it also creates hierarchies and possibilities for domination By drawing on analyses in political philosophy political science sociology history social theory and media studies the essays in this collection discover new and forgotten ways of thinking about debt and North South relations They combine a discussion of the European and global North South divide with an effort to retrieve alternatives to the dominant divisive uses of debt in staking out claims against someone else and as a means of social control Wind Energy and EU Climate Policy ,

Combating Poverty and Social Exclusion in European Union Law Ane Aranguiz,2022-03-30 This book examines the potential role of European Union law in combating poverty and social exclusion in the European Union Anti poverty strategies have been part of the European Union agenda for decades Most saliently over a decade ago the EU s Member States pledged to lift 20 million people out of poverty In spite of this commitment the EU did not even meet a quarter of this target and over 113 million people still were at risk of poverty and social exclusion by the end of 2020 This book addresses the incongruence between a quite developed EU policy strategy and a well embedded legal objective on the one hand and the lack of direct legal action on the other Analysing the role of social policy instruments fundamental rights and the constitutional framework of the European Union it makes a detailed case for a contribution of EU law to the policy objective of combating poverty and social exclusion Drawing on work in law politics social policy and economics this book will interest scholars and policymakers in the areas of EU law labour and social security human rights political science and social and public policy The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution CC BY 4 0 license **Europe's Vulnerabilities in Modern Conflict** Artur

Victoria,2025-11-09 Europe stands at a crossroads in its geopolitical evolution facing a spectrum of security threats that span the traditional and the novel the visible and the covert For decades the continent benefited from a relatively stable security environment under the protective umbrella of multilateral institutions and international norms This stability however created structural weaknesses defence budgets stayed low critical infrastructure aged without adequate protection and the urgency to modernise military capabilities waned The result is a Europe that is economically powerful but strategically fragile a continent whose institutions were built for peace yet must suddenly contend with a world slipping back into great power rivalry asymmetric conflict and technological disruption The vulnerabilities Europe faces today are not confined to a single domain Conventional military threats have resurfaced in ways many policymakers once believed impossible after the Cold War Terrorism though less dominant in headlines remains a persistent and decentralised danger that exploits social fragmentation and gaps in intelligence coordination Hybrid warfare deliberate ambiguity disinformation economic coercion and covert action targets the political cohesion that the European Union relies on Cyber warfare meanwhile cuts across every modern system from energy grids and financial institutions to hospitals and government services exposing uncomfortable interdependencies and inconsistent standards of protection These challenges are not occurring in isolation They interact and

amplify one another A cyberattack on energy networks can destabilise a country's political environment creating opportunities for external actors to launch disinformation campaigns A terrorist incident can inflame polarisation weaken trust in institutions and make it easier for hostile states to spread influence operations A conventional military threat can be paired with hybrid tactics designed to slow European decision making undermine solidarity and fracture alliances Modern conflict is not neatly compartmentalised it is fluid blended and strategically synchronised Europe must therefore confront not only individual threats but also the combined effect of multidimensional pressure
