

Figure 2 Procedure of SDCCH congestion rate analysis

First, determine the level of the SDCCH congestion rate. If the congestion occurs in a large area, check the traffic volume and the setting of T3212. Then, calculate the SDCCH capacity to check whether it meets the system demand and whether the faults exist on system-level equipment or transmission. If congestion occurs in only a few cells, check the hardware, data configurations, and Uu interface quality of the cell.

3.2 Optimization Method of SDCCH Congestion Rate

3.2.1 Checking Hardware

Faults on the TRX, BTS, and transmission may cause SDCCH congestion.

To see whether there are faults on the hardware, query the alarms of transmission, board communication, CDU VSWR, and clock. In addition, query transmission-related traffic counters such as the CRC frames received by the BTS on the LAPD link in the LAPD performance measurement.

3.2.2 Checking Channel Configuration

Query the traffic statistics to see whether the traffic volume on the SDCCH and TCH are higher than the normal value. If the congestion is caused by excessive traffic on the SDCCH, for multi-TRX BTSs, enable SDCCH dynamic allocation function or increase the number of SDCCH channels to relieve the congestion. For cells with only one TRX or without extra channels, enable the very early immediate assignment procedure. In the very early immediate assignment procedure, the TCH channel is immediately assigned when the SDCCH has no available resource during the processing of access request. In this case, a TCH can be used as only one SDCCH, which is a waste of the TCH resources. For the method of computing the capacity, refer to the *Guide to Capacity Planning*.

Some counters related to the BSC6000 are listed in the following table.

Ca use s	BSC-Level	Cell-Level
Tra ffic Lo ad	Help of Performance Counter Reference > BSC Access Measurement > Measurement per BSC SDCCH Congestion Rate (perflow) (7%) ZK5004: Traffic Volume on SDCCH per BSC	TS3010: Traffic Volume of Signaling Channels (SDCCH) CS5010: MRs on Signaling Channels (SDCCH) CS5023: Traffic Volume of Speech Service on SDCCH CS5024: Traffic Volume of Short Message Service on SDCCH
