The Green Archipelago:

Politics in the Tokugawa Bakufu, 1600-1843 Conrad D. Totman, 1988 The Green Archipelago Conrad D.

Totman, 1989 This is a superb book on an important subject the pulling back of Japan beginning in the late 17th century from the utter destruction of her forests a course on which the country seemed bent in 1600 and from the ecological economic and social catastrophe that would have followed The immense importance of the subject for Japanese history is obvious Thomas R Smith University of California Berkeley

Die Stadt in der Stadt Oswald Mathias Ungers, Rem Koolhaas, Peter Riemann, Florian Hertweck, Sébastien Marot, 2013 In the manifesto *The City in the City* Berlin A Green Archipelago Oswald Mathias Ungers and a number of his colleagues from Cornell University presented the first concepts and intellectual models for the shrinking city In contrast to the reconstruction of the European city that was popular at the time they developed the figure of a polycentric urban landscape However the manifesto really began to exert an effect beginning in the 1990s onwards when the focus of the urban planning discourse turned to the examination of crises recessions and the phenomenon of demographic shrinking This critical edition contains a previously unpublished version of the manifesto by Rem Koolhaas as well as interviews with co authors Rem Koolhaas Peter Riemann Hans Kollhoff and Arthur Ovaska Introductory texts explain the development of the manifesto between Cornell and Berlin position the work in the planning history of Berlin and reveal its influence on current approaches FLORIAN HERTWECK born in Bonn in 1975 is associate professor for architectural design architectural theory and urban planning in Versailles and an associate in the planning office Hertweck Devernois SEBASTIEN MAROT born in Paris France in 1961 is founding member of the Ecole d architecture de la ville et des territoires Marne la Vall e and visiting professor at numerous universities including the ETH Zurich and Harvard

The Green Challenge Dick Richardson, Chris Rootes, 2006-01-16 A comprehensive account of the development of Green parties in Europe demonstrating the shifting balance of party political competition the factor the authors believe most strongly influences the fortunes of the Greens

The Green Tiger Barbara Goldoftas, 2006 The Philippines was once famous for the beauty of its reef ringed islands white beaches and lush forests In less than a half century its forests were felled its oceans over fished and its coral reefs destroyed The rapid harvest of once abundant resources has brought droughts deadly flash floods and the collapse of vital fisheries As the rural economy weakened and millions migrated to cities they overwhelmed the urban infrastructure Today the Philippines stands as an example of the profound and sweeping consequences of ecological decline In *The Green Tiger* Barbara Goldoftas documents this tragic trajectory But hers is not a story of hopelessness and inevitable defeat In lyrical unflinching prose she traces the struggle for conservation in the Philippines from isolated villages to large cities and in the process illustrates the surprising ways in which conservation and economic growth can effectively co exist

Seeds of Control David Fedman, 2020-07-23 Conservation as a tool of colonialism in early twentieth century Korea Japanese colonial rule in Korea 1905 1945 ushered in natural resource management programs that profoundly altered

access to and ownership of the peninsula's extensive mountains and forests. Under the banner of forest love, the colonial government set out to restructure the rhythms and routines of agrarian life, targeting everything from home heating to food preparation. Timber industrialists meanwhile channeled Korea's forest resources into supply chains that grew in tandem with Japan's imperial sphere. These mechanisms of resource control were only fortified after 1937 when the peninsula and its forests were mobilized for total war. In this wide-ranging study, David Fedman explores Japanese imperialism through the lens of forest conservation in colonial Korea, a project of environmental rule that outlived the empire itself. Holding up for scrutiny the notion of conservation, *Seeds of Control* examines the roots of Japanese ideas about the Korean landscape as well as the consequences and aftermath of Japanese approaches to Korea's greenification. Drawing from sources in Japanese and Korean, Fedman writes colonized lands into Japanese environmental history, revealing a largely untold story of green imperialism in Asia.

Green Parties in Europe Emilie van Haute, 2016-04-28. The emergence of green parties throughout Europe during the 1980s marked the arrival of a new form of political movement challenging established models of party politics and putting new issues on the political agenda. Since their emergence, green parties in Europe have faced different destinies in countries such as Germany, Belgium, Finland, France, and Italy; they have accumulated electoral successes, participated in governments, implemented policies, and established themselves as part of the party system. In other countries, their political relevance remains very limited. After more than 30 years on the political scene, green parties have proven to be more than just a temporary phenomenon. They have lost their newness, faced success and failure, power and opposition, grassroots enthusiasm and internal conflicts. *Green Parties in Europe* includes individual case studies and a comparative perspective to bring together international specialists engaged in the study of green parties. It renews and expands our knowledge about the green party family in Europe.

Parkscapes Thomas R. H. Havens, 2011. Thomas Havens shows how revolutionary officials in the 1870s seized private properties and converted them into public parks for educating and managing citizens in the new emperor-sanctioned state. Rebuilding Tokyo and Yokohama after the earthquake and fires of 1923 spurred the spread of urban parklands both in the capital and other cities. According to Havens, the growth of suburbs, the national mobilization of World War II, and the post-1945 American occupation helped speed the creation of more urban parks, setting the stage for vast increases in public green spaces during Japan's golden age of affluence from the 1960s through the 1980s. Since the 1990s, the Japanese public has embraced a heightened ecological consciousness and become deeply involved in the design and management of both city and natural parks, realms once monopolized by government bureaucrats. As in other prosperous countries, public-private partnerships have increasingly become the norm in operating parks for public benefit, yet the heavy
