The United Stories of America Rolf Lundén, 2022-06-08 This book discusses the American short story composite or short story cycle a neglected form of writing consisting of autonomous stories interlocking into a whole The critical work done on this genre has so far focused on the closural strategies of the composites on how unity is accomplished in these texts This study takes into consideration to a greater degree than earlier criticism the short story composite as an open work emphasizing the tension between the independent stories and the unified work between the discontinuity and fragmentation on the one hand and the totalizing strategies on the other The discussion of the genre is illustrated with references to numerous American short story composites

**Creating Yoknapatawpha** Owen Robinson, 2013-10-23 Creating Yoknapatawpha is a study of the crucial interplay of reading and writing processes involved in constructing the textual environment of William Faulkner's work and the nature and significance of the world created by these many forces Yoknapatawpha County the author contends is the product of these mainly mental processes of construction at all levels and it is in the similar and even analogous situations that exist between readers and writers of and in the fiction that the dynamic of Faulkner's work is most keenly discovered The book discusses novels from throughout Faulkner's career and uses elements of Bakhtinian and reader response theory among others to explore its subject eschewing the limited focus both of strictly formal and more content oriented approaches and demonstrating the need for readers and writers to work together whether harmoniously or otherwise By examining the fictive nature of Yoknapatawpha and the requirement for everybody to participate fully in its creation we can establish useful bases for investigations into the real world issues with which Faulkner is so concerned
