ECKM2014-Proceedings of the 15th European conference on Knowledge Management Carla Vivas,2014-10-01 The world economy in which we are living poses challenges that lead to a realization that more of the same will be difficult to sustain This provides an illustration that in order to create new or modified knowledge practices strengthen customer relationships and thus positively influence customer satisfaction organizations must be flexible in configuring combining knowledge and

knowledge structures in a way that is appropriate for delivering value to the customer. It must simultaneously develop effective strategies for updating the knowledge of its staff members necessary for underpinning the creation and delivery of appropriate knowledge services. Thus unlearning/forgetting becomes a critical means for organizational success. The ECKM community of scholars has already initiated dialogue that links its particular strengths to innovation issues. This conference aims to further that dialogue by attracting leading edge work that leverages the ECKM community's in-depth understanding of learning and unlearning to better understand knowledge management. Our aim is to stimulate breakthrough research streams linking learning, unlearning, and knowledge management. How can organizations tailor use and extend techniques and tools from knowledge management for improving their business practices and processes? Building upon existing work on knowledge management, KM, and organizational learning, the conference will promote interdisciplinary approaches from computer science and information systems, business management, and organization science, as well as cognitive science. Emphasis will be put on systematic learning from experience, KM tools, and KM success factors. A special interest belongs to knowledge management initiatives which are lightweight, i.e. do not place considerable additional burden on users, and KM experts allow an incremental adoption, i.e. do not require large up-front investment before any return of investment is at least visible, and are flexible regarding frequent changes in experts and topics. Continuing the success of the ECKM conference series since 2000, the 2015 conference will provide an international communication forum bringing together academia and industry for discussing the progress made and addressing the challenges faced by continuous learning in knowledge intensive organizations.

Understanding Local Area Networks Arthur William Thompson, 2000. Aimed at technical or vocational students, this book offers an introduction to networking and telecommunications uses of local area networks (LANs). Considerations for installation, administration, and maintenance of LANs is provided, and information on the four most common LAN protocols is discussed.

[RoboCup 2018: Robot World Cup XXII](#) Dirk Holz, Katie Genter, Maarouf Saad, Oskar von Stryk, 2019-08-06. This book includes the post-conference proceedings of the 22nd RoboCup International Symposium held in Montreal, QC, Canada, in June 2018. The 32 full revised papers and 11 papers from the winning teams presented were carefully reviewed and selected from 51 submissions. This book highlights the approaches of champion teams from the competitions and documents the proceedings of the 22nd annual RoboCup International Symposium. Due to the complex research challenges set by the RoboCup initiative, the RoboCup International Symposium offers a unique perspective for exploring scientific and engineering principles underlying advanced robotic and AI systems.
