**Self-Producing Systems** John Mingers, 2013-11-21

John Mingers new volume *Self Producing Systems Implications and Ap plications of Autopoiesis* is a much needed reference on autopoiesis a subject penetrating many disciplines today I can genuinely say that I enjoyed reading the book as it took me stage by stage through a clear and easy to grasp understanding of the concepts and ideas of auto poiesis and then as the book s title suggests on through their applica tions I found the summary in Chapter 12 particularly useful helping to crystalize the main points of each chapter The book conveyed enthusi asm for the subject and stimulated my interest in it At times the book is demanding but only because of the breadth of the subject matter the terms and concepts associated with its parts and the challenge of keep ing hold of all this in the mind at once This is an exceptional text

ROBERT L FLOOD Hull UK Preface In recent years Maturana s and Varela s concept of autopoiesis origi nally a biological concept has made a remarkable impact

not just on a single area but across widely differing disciplines such as sociology policy science psychotherapy cognitive science and law Put very briefly the term autopoiesis connotes the idea that certain types of systems exist in a particular manner they are self producing systems In their operations they continuously produce their own constituents their own components which then participate in these same production processes

**The Human Needs** Valentin Matcas,2013-03-20

Everything that you do in life you do to fulfill needs and meanings including social demands security needs eating needs developmental needs addictions recovery needs reproduction competitive needs and learning at all cognitive existential and social levels Furthermore you must follow laws and moral codes as you fulfill your needs but can you follow these simultaneously You might smile slightly here since experience is personalized and therefore unique throughout life and throughout the world but should this actually be the case Why should social laws and human needs interfere in a human world Why should you ever encounter problems as a living human being in a human world What are your needs and feelings exactly and what do they make you do Who exactly sends you your human needs Is everything that you know about the human needs pertinent enough to assure a meaningful successful and fulfilling life Because everybody ends up in dreadful circumstances at times struggling with various problems it happens to you and to everybody else so why should you ever have to fail in life at least occasionally as a human being while following social rules and human needs simultaneously Yet since it happens to everybody can humans actually be at fault Because if humans themselves are considered faulty incapable and compromised in a human world through their own natural human needs and feelings then what exactly do laws and authorities seek if they do not serve humans society human needs and human fulfillment the most All human needs are specific types of feelings part of the human cognition part of humans and therefore part of life While it seems that authorities hold you responsible for everything that life demands from you through your human feelings and human needs ending up judging life through you while punishing you dreadfully done deliberately to reach you to exploit you or to remove you systematically Since everybody becomes involved when you must fail in the current society as you have to be highly capable to manage both life and society simultaneously while you do not smile slightly anymore Furthermore you notice how you cannot find to learn anything on this topic but only laws codes stereotypes and irrelevant or trivial beliefs While as you study everything closely you notice the human condition marked by the human needs and feelings on one side and by people's ignorance of the human needs and feelings on the other Throughout this book we study the comprehensive human condition as it starts with the human needs We identify and analyze all needs feelings fulfillment behavior reasoning and meaning while understanding life cognition society and the wider world altogether If you seek to learn more about yourself and the human needs this book is for you
