American Remakes of British Television Carlen Lavigne, Heather Marcovitch, 2011-03-31 Ever since Norman Lear remade the BBC series *Till Death Us Do Part* into *All in the Family* American remakes of British television shows have become part of the American cultural fabric Indeed some of the programs currently said to exemplify American tastes and attitudes from reality programs like *American Idol* and *What Not to Wear* to the mock documentary approach of *The Office* are adaptations of successful British shows Carlen Lavigne and Heather Marcovitch's *American Remakes of British Television Transformations and Mistranslations* is a multidisciplinary collection of essays that focuses on questions raised when a foreign show is adapted for the American market What does it mean to remake a television program What does the process of Americanization entail What might the success or failure of a remade series tell us about the differences between American and British producers and audiences This volume examines British to American television remakes from 1971 to the present The American remakes in this volume do not share a common genre format or even level of critical or popular acclaim What these programs do have in common however is the sense that something in the original has been significantly changed in order to make the program appealing or accessible to American audiences The contributors display a multitude of perspectives in their essays British to American television remakes as a whole are explained in terms of the market forces and international trade that make these productions financially desirable *Sanford and Son* is examined in terms of race and class issues Essays on *Life on Mars* and *Doctor Who* stress television's role in shaping collective cultural memories An essay on *Queer as Folk* explores the romance genre and also talks about differences in national sexual politics An examination of *The Office* discusses how the American remake actually endorses the bureaucracy that the British original satirized *The Oxford Handbook of Digital Technologies and Mental Health* Marc N.
