My Life- My War- World War 2 Stanley B. Loomis, 2010 Wars are started by a person or persons and are usually a quest for power for a person or a group of people and they don't really care how many people are killed nor how many families are losing a father mother or brothers or whole families and their relatives Sometimes it is necessary to start a war by a peaceful nation against countries that are harming and have the publically displayed their intentions to extend their borders by taking land from established country's land and people This I would consider declaring a war to be the only necessary solution to the problem but still a war with people getting maimed and killed In World War One Germany was the problem once again lust for power I wasn't even thought of at that period of time in fact I hadn't even arrived on the scene at that point of time But think about it for a moment there's not one inch of land that has increased in size in those thousands of years of civilization and wars I was a training in Camp Blanding in Florida we could look in any direction and there was a sign posted in large letters Kill or Be Killed Kill or Be Killed We were just 18 or 19 year old kids think about it Kill or Be Killed what an education but necessary to imprint it inside our young brains It gave us young kids a reason to become killers hesitate for a second and you're dead Back then in training we used to repeat over and over was that wars were necessary to Decrease The Surplus Population It is most certainly a true statement

The Targeting System of Language Leonard Talmy, 2024-04-09 A proposal that a single linguistic cognitive system targeting underlies two domains of reference anaphora speech internal and deixis speech external In this book Leonard Talmy proposes that a single linguistic cognitive system targeting underlies two domains of linguistic reference those termed anaphora for a referent that is an element of the current discourse and deixis for a referent outside the discourse and in the spatiotemporal surroundings Talmy argues that language engages the same cognitive system to single out referents whether they are speech internal or speech external Talmy explains the targeting system in this way as a speaker communicates with a hearer her attention is on an object to which she wishes to refer this is her target To get the hearer s attention on it as well she uses a trigger a word such as this that here there or now The trigger initiates a three stage process in the hearer he seeks cues of ten distinct categories uses these cues to determine the target and then maps the concept of the target gleaned from the cues back onto the trigger to integrate it into the speaker s sentence achieving comprehension The whole interaction Talmy explains rests on a coordination of the speaker s and hearer s cognitive processing The process is the same whether the referent is anaphoric or deictic Talmy presents and analyzes the ten categories of cues and examines sequences in targeting including the steps by which interaction leads to joint attention A glossary defines the new terms in the argument
