Taskcentered Social Work

Mark Doel, Peter Marsh

Taskcentered Social Work:

Task-Centred Social Work Mark Doel, Peter Marsh, 2017-03-02 Task centred practice is a forward thinking goal orientated approach to social work It is a practice based approach built on research which reflects the new mood being developed in the social work field and it has now been successfully used in a wide variety of settings and circumstances The theme of Task Centred Social Work is partnership exploring the principles on which task centred practice is based while offering clear and practical guidance for work whether with people who seek help with social problems or with those who are involuntary clients The book describes in detail the sequence of work to help clients move from present problems to future goals This is illustrated by a case study which runs through the chapters and uses an imaginative recording style Checklists and bibliographies are also used to aid understanding The authors respond to the model s critics and explore both the scope and the limitations of the task centred practice Social professionals whether working in practice or in training settings will find this book an invaluable aid to the development of successful social practice work Social Work Treatment 4th Edition Francis J. Turner, 1996-09-01

Solution-oriented Social Work Practice Gilbert J. Greene, Mo Yee Lee, 2011 Too often in practice there is a tendency to pathologize clients requiring a diagnosis as part of the helping relationship Suppose however that most of the client problems that social workers encounter have more to do with the vagaries of life and not with what clients are doing wrong This powerful idea is the philosophy behind the strengths based approaches to social work This groundbreaking practice handbook takes this concept one step further combining the different strengths based approaches into an overarching model of solution oriented social work for greater impact The strengths perspective emphasizes client strengths goal setting and a shared definition of positive outcome Solution focused therapy approaches ongoing problems when they have temporarily abated amplifying exceptions as solutions This natural but rarely explored pairing is one component in the challenging and effective practice framework presented here by the authors two seasoned practitioners with over 50 years of combined experience By integrating the most useful aspects of the major approaches a step by step plan for action emerges With this text in hand you will Integrate elements from the strengths perspective solution focused therapy narrative therapy and the strategic therapy of the Mental Research Institute the MRI approach into an effective and eclectic framework Build and practice your skills using case examples transcripts and practical advice Equip yourself with the tools you need to emphasize clients strengths Challenge the diagnosis first medical model of behavioral health care Collaborate with clients to get past thinking first order change and more to acting outside the box second order change Learn to work with a wide variety of clients including individuals groups and families involuntary clients clients with severe mental illness and clients in crisis For any student or practitioner interested in working with clients towards collaborative and empowering change this is the essential text Task-centered Practice William James Reid, Laura Epstein, 1977 Based on the papers of the Conference on applications of task centered treatment held at the University of Chicago 1975 **Social**

Work Treatment Francis J. Turner, 2011-03-15 First published in 1974 Social Work Treatment remains the most popular and trusted compendium of theories available to social work students and practitioners It explores the full range of theoretical approaches that drive social work treatment and knowledge development from psychoanalysis to crisis intervention This treasure trove of practice knowledge equips professionals with a broad array of theoretical approaches each of which shine a spotlight on a different aspect of the human condition Emphasizing the importance of a broad based theoretical approach to practice it helps the reader avoid the pitfalls of becoming overly identified with a narrow focus that limits their understanding of clients and their contexts This sweeping overview of the field untangles the increasingly complex problems ideologies and value sets that define contemporary social work practice The result is an essential A to Z reference that charts the full range of theoretical approaches available to social workers regardless of their setting or specialty Task-centred Social Work Mark Doel, Peter Marsh, 1992 The theme of Task Centred Social Work is partnership exploring the principles on which task centred practice is based while offering clear and practical guidance for work whether with people who seek help with social problems or with those who are involuntary clients The book describes in detail the sequence of work to help clients move from present problems to future goals This is illustrated by a case study which runs through the chapters and uses an imaginative recording style Checklists and bibliographies are also used to aid understanding The authors respond to the model's critics and explore both the scope and the limitations of the task centred practice **Problems, Tasks and Outcomes** E. Matilda Goldberg, Jane Gibbons, Ian Sinclair, 2021-11-07 In the 1980s although most social workers organised their time and described their work in terms of cases research studies had cast serious doubts on the efficacy of working in this way As a result there had been growing anxiety about what social workers do what they ought to do and the training they needed Task centred casework was an approach to social work which proposed a solution to some aspects of this dilemma Growing out of the surprising results of an American research study it broke free from the traditional psychoanalytic approach to casework It aimed at clarity of purpose a concentration on the clients perceptions of the problems openness about clients and helpers intentions and agreement about what is to be done and achieved within a specified time Originally published in 1985 this book brings together three British studies that accompanied and in some respects pioneered the introduction of task centred casework into the United Kingdom The studies describe and evaluate task centred casework with social services department clients with young people on probation and with men and women referred to hospital after poisoning themselves The research suggests what task centred casework can and cannot achieve describes how clients experience it and seeks to define the skills it requires The studies also provide some reasons why many previous studies of social work have failed to find evidence for social work effectiveness The book uses much case material to illustrate methods of task centred casework and its outcomes as seen by clients social workers and an independent outsider It should still be of interest to social workers teachers of social work and social work students More generally it will be welcomed by

all those who are interested in building social work on a surer basis than anecdote and fashion Task-centered Social Work Mark Doel, Peter E. Marsh, 1992 *Generalist Practice* Eleanor Reardon Tolson, William James Reid, Charles D. Garvin, 2003 This basic textbook seeks to establish a task centered methodology a structured short term problem solving approach applicable across systems at five levels of practice the individual the family the group organizations and communities The second edition offers more information on systems theories and includes case studies with each chapter Checklists are provided for each level of practice along with questions for consideration and practice exercises to help students monitor their understanding and skill development **Brief Treatment and a New Look at the Task-centered Approach** Laura Epstein, 1992 Helping People Laura Epstein, 1980 **Social Work Practice with Children and Adolescents** Steven R. Rose, Marian Fatout, 2003 This text identifies factors that influence children and adolescents and indicates how professionals can help young people as clients in a variety of settings The strengths of the text include a pragmatic focus on both children and adolescents a broad conception of practice an emphasis on assessment the use of historical organizational and developmental perspectives and a major social problems focus The text is divided into three parts to identify the context of social work with children and adolescents examine the helping process and discuss applications of that process **Educational Supervision in Social Work** Jonathan Caspi, William J. Reid, 2002-11-21 This book provides a comprehensive examination of instructional supervision and introduces the Task Centered Model for Educational Supervision TCS It begins by reviewing the history of educational supervision in social work and principles of effective teaching practices in the field While theories about the principles and purposes of educational supervision abound it has proven difficult to translate these ideas into a coherent model of supervisory practice Educational Supervision in Social Work answers that need presenting in detail TCS an ordered series of discrete activities that supervisors and supervisees follow during and between supervision meetings Designed to promote the continuous attainment of learning and practice objectives TCS accommodates new models of field instruction addresses common accountability concerns in social work supervision and teaches practitioners how to be self initiating and evaluative Focusing on the practical implementation of TCS Caspi and Reed have included detailed case vignettes throughout the book that provide concrete examples of putting theory into practice Both supervisors of interns and staff as well as supervisees will find TCS a helpful tool in the supervisory process The Task-centred Book Peter Marsh, Mark Doel, 2005 Peter Marsh and Mark Doel s new book is a radical departure from traditional literature on social work methods The main reference point is the voice of practitioners service users and carers as researched and developed by the authors over twenty years *New York Court of Appeals.
