**The Growing-Tree** Gwen Mariani,2018-10-03 The Growing Tree By Gwen Mariani Lizzi Young lives in a small New England town with her husband two teenage sons and four dogs At forty four years old she finds herself living the life she dreamed of but something has been stirring beneath the foundation of safety and security on which she has built her life and family A passing spring storm reveals a hole in her beautiful backyard and Lizzi begins to question the solid foundation she has depended on all these years Roots from a large oak tree cut down several years earlier have finally disintegrated collapsing within and exposing the past devastation to the light of day This discovery comes on the heels of her extended family becoming bitter and estranged after the death of her grandmother Gigi three years earlier As they attempt to drag her into the latest family saga that creates a clear divide in the ones she loves it quickly becomes the most difficult decision she has ever had to make Unable to make sense of the emotional turmoil she feels for them and the strong stance not to get involved this time she finds herself deep in the center of a long ago buried issue This groundbreaking breakthrough reveals her past in a whole new light and she finds a new perspective on her beliefs and the family that raised her This hole is a catalyst for Lizzi to dig up her past and come to terms with the crumbling foundation of her family structure Through childhood memories that flood her mind Lizzi struggles to face her own insecurities and is determined to heal this damaged part of her landscape and life Along with a little encouragement from her deceased grandmother Gigi insights from her quirky and elderly Aunt Eleanor and an unlikely connection to a lonely neighbor Lizzi finds the strength to rebuild her foundation and grow as an individual

**Challenges in Science Education Research** Kim Chwee Daniel Tan, Mijung Kim, 2012-04-27 In contemporary society science constitutes a significant part of human life in that it impacts on how people experience and understand the world and themselves. The rapid advances in science and technology, newly established societal and cultural norms and values, and changes in the climate and environment, as well as the depletion of natural resources, all greatly impact the lives of children and youths and hence their ways of learning, viewing the world, experiencing phenomena around them, and interacting with others. These changes challenge science educators to rethink the epistemology and pedagogy in science classrooms today as the practice of science education needs to be proactive and relevant to students and prepare them for life in the present and in the future. Featuring contributions from highly experienced and celebrated science educators as well as research perspectives from Europe, the USA, Asia, and Australia, this book addresses theoretical and practical examples in science education that on the one hand plays a key role in our understanding of the world and yet paradoxically now acknowledges a growing number of uncertainties of knowledge about the world. The material is in four sections that cover the learning and teaching of science from science literacy to multiple representations, science teacher education, the use of innovations and new technologies in science teaching and learning, and science learning in informal settings including outdoor environmental learning activities. Acknowledging the issues and challenges in science education, this book hopes to generate collaborative discussions among scholars, researchers, and educators to develop critical and creative ways of science teaching to improve and enrich the lives of our children and youths.
