## **Spectral Line Formation:**

**Spectral Line Formation** John T. Jefferies, 1968 The purpose of this book is to discuss certain aspects of the theory of the formation and analysis of the line spectrum of a hot gas The underlying motivation for most of the studies discussed here lies in a desire to develop a physically sound procedure for interpreting the line spectrum of a stellar atmosphere correspondingly the major emphasis is given to problems encountered in astrophysics *Progress in Stellar Spectral Line Formation Theory* J.E. Beckman, L. Crivellari, 2012-12-06 Spectral line formation theory is at the heart of astrophysical diagnostic Our knowledge of abundances in both stellar and interstellar contexts comes almost entirely from line analysis as does a major fraction of our ability to model stellar atmospheres As new facets of the universe become observable so the techniques of high resolution spectroscopy are brought to bear with great reward Improved instruments such as echelle spectrographs employing detectors of high quantum efficiency have revolutioned our ability to observe high quality line profiles although until now this ability has been confined to the brightest stars Fabry Perot interferometers and their modern derivatives are bringing new ranges of resolving power to studies of atomic and ionic interstellar lines and of course radio techniques imply exceedingly high resolution for the cool interstellar medium of molecules and radicals Telescopes in space are extending the spectral range of these types of observations Already the Copernicus and IUE high resolution spectrographs have given us a tantalizing glimmer of what it will be like to obtain ultraviolet spectra with resolution and signal to noise ratio approaching those obtainable on the ground Fairly soon Space Telescope will be producing high resolution spectroscopic data of unparalleled quality and distance range As often happens in astrophysics the challenge is now coming from the observers to the theorists to provide interpretational tools which are adequate to the state of the data
