Smit Sibinga,P.C. Das,H.F. Taswell,2012-12-06 THE PHILOSOPHY OF QUALITY ASSURANCE IN THE BLOOD BANK H F Taswell One year before this symposium Cees Smit Sibinga and I began to discuss an approach to quality assurance in the blood bank which we felt would be both important and practical and could serve as the basis for the choice of subjects to be presented in the symposium As an introduction to this book I would like to outline our approach the subjects chosen and the rationale behind our choice What is the fundamental purpose of a blood bank and transfusion service Simply stated the purpose of a blood bank and transfusion service and of a quality assurance program in blood banking is for the one to provide and the other to assure safe and effective transfusion therapy This objective is in contrast to that of other clinical laboratories The objective in a clinical chemistry laboratory is to produce accurate test results which will be meaningful to the clinician taking care of his patient In most clinical laboratories therefore the goals of a quality assurance program are largely quantitative that is to assure accurate numerical test results In contrast in the blood bank the goals of quality assurance are primarily qualitative that is to assure safe and effective transfusion As a result two somewhat different approaches to quality assurance are necessary Hospital Topics ,1962 **Practical Transfusion Medicine** Michael F. Murphy,David J. Roberts,Mark H. Yazer,Nancy M. Dunbar,2022-08-22 Practical Transfusion Medicine Sixth Edition The pace of change in transfusion medicine is relentless with new scientific and technological developments and continuing efforts to improve transfusion practice This sixth edition of Practical Transfusion Medicine has been updated significantly to reflect the rapid changes in transfusion medicine since the fifth edition was published in 2017 The primary purpose of this edition remains the same as the first to provide a comprehensive guide to transfusion medicine This book contains more depth of information than standard handbooks on transfusion medicine whilst being more concise and approachable than a standard reference text This book covers the principles of transfusion medicine

the complications of transfusion practice in blood centres and hospitals and clinical transfusion practice This sixth edition includes a new section on patient blood management cellular and tissue therapy organ transplantation and the development of the evidence base for transfusion It also features a new chapter on transfusion associated circulatory overload to underline its importance as a complication of transfusion and a reconfiguration of the section on clinical transfusion practice to allow consideration of the transfusion management of medical surgical and haematology patients with and without bleeding This sixth edition of Practical Transfusion Medicine provides accessible and comprehensive coverage of the field of transfusion medicine It is a standalone text that will be useful to clinical and scientific staff not only for trainees who require an overview of the field but also for established practitioners who are involved in some aspect of transfusion medicine and require a comprehensive accessible reference book

**The Computer and Blood Banking** J. R. Möhr,A. **Trigger Factors in Transfusion Medicine** C.Th. Smit Sibinga,P.C. Das,E.L. Snyder,2012-12-06 It is an honour and a pleasure to welcome you all at this 20th annual International Symposium on Blood Transfusion in the Netherlands This year you celebrate its 20th anniversary and I congratulate the Staff of the Blood Bank Noord Nederland and especially Dr Smit Sibinga for this great achievement As most of you know the name of the person of Dr Smit Sibinga is unbreakably connected with the annual symposium in Groningen which he has organized each year from the very start 20 years ago The reputation of any symposium depends heavily on the quality of the lectures I think it is not possible to organize 20 symposia in a row if the topics lack actual relevance and the speakers are not of excellent reputation Dr Smit Sibinga has proven to have a keen eye for selecting interesting themes and eminent speakers Although a lot of different topics have been dealt with in the past 20 years which each attracted the attention of a different group in the field of blood transfusion it is not surprising that after a tradition of 20 years several speakers but also a lot of attendees are not for the first time in Groningen to participate in this event It gives the symposium a unique atmosphere of intimacy It is not hard to admit that most of the newer developments in transfusion medicine take place outside the Netherlands
