Metacognition and Education: Future Trends Shirley Larkin, 2023-10-06 Metacognition is crucial to education in a changing world. The role of mobile applications, AI, and global issues such as climate change make the need for developing learners with the ability to monitor and control their own thinking increasingly necessary. Metacognitive learners are learners who can draw on their own knowledge of their own thinking processes to optimise the conditions under which they learn best. Metacognitive learners are self-regulating and pro-active in motivating themselves to learn new skills. Metacognitive learners are strategic in terms of managing their own resources to get the best from every learning opportunity and to transfer that knowledge to new areas of work. This book is timely in demonstrating how metacognition research is addressing issues of importance in future education. The chapters are authored by an international group of scholars from four continents who are experts in the field of metacognition and self-regulation research. Drawing on their years of experience, they look to the future to suggest the future trends in metacognition research. At the same time, chapters are rooted in practical application and suggest ways in which the research can be translated into educational environments. The book addresses some new areas of metacognition research such as mind wandering as well as established areas such as teacher metacognition. We are also reminded to consider the social interactions between students and others and the role that relationships play in developing metacognition. Both researchers and educators of all types will find something of interest here. The book sets the trend for future trends in metacognition research.

Trends in Psychotherapy Research M. E. Abelian, 2006 Psychotherapy is the treatment of mental and emotional disorders using psychological methods. Psychotherapy thus does not include physiological interventions such as drug therapy or electroconvulsive therapy, although it may be used in combination with such methods. Behaviour therapy aims to help the patient eliminate undesirable habits or irrational fears through conditioning. Techniques include systematic desensitisation, particularly for the treatment of clients with irrational anxieties or fears, and aversive conditioning, which uses negative stimuli to end bad habits. Humanistic therapy tends to be more optimistic, basing its treatment on the theory that individuals have a natural inclination to strive toward self-fulfilment. Therapists such as Carl Rogers and Abraham Maslow used a highly interactive client-therapist relationship, compelling clients to realise exactly what they are saying or how they are behaving in order to foster a sense of self-awareness. Cognitive therapies try to show the client that certain usually negative thoughts are irrational, with the goal of restructuring such thoughts into positive, constructive ideas. Such methods include rational emotive therapy, where the therapist argues with the client about his negative ideas, and cognitive restructuring therapy, in which the therapist works with the client to set attainable goals. Other forms of therapy stress helping patients to examine their own ideas about themselves.

We include contributions that address the question of causal attribution. Many published studies are correlational in nature because of the inherent difficulty of conducting longitudinal experiments based on a major lifestyle decision such as the decision to commit to a mental practice over a period of years. We also feature clinical and case studies, integrative syntheses, and significant opinion articles.

Niksen Olga Mecking, 2021-01-12. The Dutch people are some of the happiest in the world. Their secret? They are masters of *niksen* or the art of doing nothing. *Niksen* is not a form of meditation nor is it a state of laziness or boredom. It's not scrolling through social media or wondering what you're going to cook for dinner. Rather, *niksen* is to make a conscious choice to sit back, let go, and do nothing at all. With this book, learn how to do nothing in the most important areas of your life such as AT HOME: Find a comfy nook and sit. No technology or other distractions. AT WORK: Stare at your computer. Take in the view from your office. Close your eyes. IN PUBLIC: Forget waiting for the bus, enjoy some relaxing *niksen* time. Backed with advice from the world's leading experts on happiness and productivity, this book examines the underlying science behind *niksen* and how doing less can often yield so much more. Perfect for anyone who feels overwhelmed, burnt out, or exhausted. *NIKSEN* does not tell you to work harder. Instead, it shows you how to take a break from all the busyness while giving you sincere, heartfelt permission to do nothing.

100 Best Trends (2005) George Ochoa, Melinda Corey, 2004-09-17. The 100 Best Trends 2005 provides readers with the first look on the most important trends currently shaping the future. Mindfulness and Meditation Blaise Aguirre, 2018-03-07. This book is an approachable introduction to the topics of mindfulness and meditation as they relate to teens and young adults. The information, guidance, and resources offered make it a valuable tool for anyone curious about this trending topic. Although mindfulness and meditation have been practiced for millennia, modern neurobiologists and psychologists are only just beginning to understand their full potential for improving physical and emotional well-being. Part of Greenwood's Q & A Health Guides series, *Mindfulness and Meditation: Your Questions Answered* provides clear, concise information for readers interested in the contemporary practice of and research behind mindfulness and meditation. It explores definitions of mindfulness and meditation, offers solutions for successfully incorporating them into our often chaotic lives, and explains their many practical applications and benefits for practitioners. Each book in this series follows a reader-friendly question and answer format that anticipates readers' needs and concerns. Prevalent myths and misconceptions are identified and dispelled, and a collection of case studies illustrates key concepts and issues through relatable stories and insightful recommendations. The book also includes a section on health literacy, equipping teens and young adults with

practical tools and strategies for finding evaluating and using credible sources of health information both on and off the Internet important skills that contribute to a lifetime of healthy decision making
