*Stones* George P. Merrill,2015-07-21 Excerpt from Stones For Building and Decoration The work herewith presented is based upon the author's handbook and catalogue of

the collection of building and ornamental stones in the United States National Museum at Washington It differs from that work however in many important particulars several new chapters having been added others rewritten and the whole so far as possible brought down to date A portion of the added matter is essentially the same though in a somewhat different form as originally appeared in the columns of Stone the American Architect the Scientific American Supplement and other of our industrial journals The writer s experience in preparing the extensive collection in the National Museum at Washington as well as its partial duplicate in the American Museum in New York City has afforded him ample opportunity for becoming acquainted with the quarry products of the country at large while extensive field trips particularly in the eastern and extreme western United States have given him a practical insight into the resources of the regions as well as some knowledge concerning the usual methods of quarrying and working That there is a demand for a comprehensive and not too technical a work on this subject has been emphatically impressed upon the writer many times during the past few years How far the pages herewith presented shall supply this demand it is left for the public to decide About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
