Strategic Decision-Making. A Practical Example Based on "Tesla" Lukas Wagner,2018-11-29 Essay from the year 2017 in the subject Business economics Business Management Corporate Governance grade 1 0 Tongji University language English abstract Decision making is a fundamental skill for any successful executive But decisions at strategic level are hard to make They require large amounts of resources and commitments which may be irreversible They involve long term consequences that are hard to predict And they require considering multiple often conflicting strategic objectives which are difficult to balance particularly in the presence of risk and uncertainty Research and thinking about modern business strategy emerged as a field of study and practice in the 1960s Prior to that time the words strategy and competition rarely appeared in the most prominent management literature When influential academics in the USA started to think fundamentally about strategic decision making in the 1980s and 90s they made the assumption that everything works in a competitive working free market and developed thereof generic strategy tools that are supposed to work everywhere However Elmes the guest speaker argues that they are not well founded since strategies need to be developed in the respective context of an industry or market This position will be explained in more detail during this essay Especially the determinant of market efficiency meaning how competitive a market is strongly influences the development of strategic decisions There are many industries where government involvement or asymmetric competition need to be considered to make strategic decisions whereby generic strategy tools tend to be ineffective Therefore the key questions for this essay will be firstly what are the traditional concepts of strategy and how have they involved secondly what actually makes a strategy successful and lastly how does it apply in practice

Competitive Analysis Djamel Eddine Laouisset,2012-05 In formulating business strategy managers must consider the strategies of the firm s competitors Competitor analysis has two primary activities first obtaining information about important competitors and second using that information to predict competitor behavior The goal of competitor analysis is to understand with which competitors to compete competitors strategies and planned actions how competitors might react to a firm s actions and how to influence competitor behavior to the firm s own advantage Porter s competitive analysis framework is based on the following four key aspects of a competitor first competitor s objectives second competitor s assumptions third competitor s strategy and fourth competitor s capabilities Objectives and assumptions are what drive the competitor and strategy and capabilities are what the competitor is doing or is capable of doing This book is an illustration of Porter s competitive analysis framework it will be very useful for management students management scholars as well as business strategy executives as it offers an overview of major strategic management concepts as well as real case studies in competitive analysis **Strategic Management** Fred R.
