Mastering Facilitation Morgan Jones,2020-10-14 With business and organisations moving at an ever faster pace and facing evermore demanding challenges the need for efficient succinct and productive interaction between individuals of those businesses and organisations is more important than ever With the bounds of communication restrictions abandoned through technological advances we can now see and hear anyone across any manner of virtual platforms anywhere around the globe and with a greater understanding of the underlying dynamics of human interaction unprecedented pressure has been thrust upon the individual or individuals who often enable these dynamic interactions the facilitator Many of us have at one time or other been responsible for a meeting whether between a small number of individuals or an entire organisation of hundreds or possibly thousands of businessmen and women Or perhaps we ve had to be the mediator in a family dispute closer to home or managed a discussion between two feuding friends or colleagues One way or another chances are all of us have been a facilitator at some point in our lives With the ever growing demands placed on facilitators this book delivers a methodical and structured approach to facilitation This book is the definitive guide to instruct and assist facilitators both new and experienced with a set of guidelines and underlying theory that will benefit any facilitator whether as a mediator between two individuals single handedly facilitating a group of 100 or working as part of a facilitation team in a multinational corporation The first part of the book develops the core basic skills of those new to the art of facilitating There are many examples and exercises to show the reader how to apply them in different situations The second part of the book is for more experienced facilitators as it focuses on more advanced skills and tackling difficult situations Specific tools and techniques are illustrated for the reader Essentially this book is aimed at developing and mastering the art of facilitation Facilitation is the art of getting the best out of groups of people to brainstorm solve problems and gain consensus Based on 30 years experience of the author and running multiple facilitation training courses across the globe this book is aimed at upskilling people managers and leaders to drive change and consensus with groups through running workshops and meetings

Leadership and Personal Development Katja Kruckeberg,Wolfgang Amann, Mike Green,2011-09-08 This book offers a modern approach to leadership and personal development emphasizing the links between these areas It presents proactive flexible strategies for growth considering sustainability complexity and creativity Structured activities and proven techniques equip readers with new skills for success

Group Model Building Rodney Scott,2018-06-12 This book describes the cognitive and interpersonal effects of group model building and presents empirical research on what group model building achieves and how Further it proposes an integrated causal mechanism for the effects on participants There have been multiple previous attempts at explaining the effects of group model building on participants and this book integrates these various theories for the first time The causal mechanisms described here suggest a variety of design elements that should be included in group model building practice For example practitioners typically try to reduce

complexity for clients to make the process feel more accessible In contrast the findings presented here suggest that the very act of muddling through complexity increases participants affective commitment to the group and the decisions made The book also describes implications for theory and practice System dynamics has traditionally been interested in using technical modeling processes to make policy recommendations Group model building demonstrates that these same techniques also have implications for group decision making as a method for negotiating agreement The book argues for the value of group model building as a mediating or negotiating tool rather than merely a positivist tool for technical problems
