Missions in the Third Millennium Stan Guthrie,2014-08-05 Christianity is the world s most global faith Meanwhile evangelical Christianity is the world s fastest growing major religion in terms of conversion growth And yet at the dawn of the third millennium the church s primary task to go and make disciples of all nations remains undone Missions in the Third Millennium charts twenty one trends both positive and negative with continuing significance for the Great Commission community in the twenty first century Revised and updated to include two new chapters on urban missions and evangelizing Muslims this up to date volume offers insights to help students churches missionaries agencies and Christians from outside the West grasp the big picture and take practical steps for more effective involvement This edition contains extensive notes expanded suggestions for further reading and discussion questions On the Threshold of the Third Millennium Foundation,1990 HyperReality Nobuyoshi Terashima,John Tiffin,2005-07-05 HyperReality is a technological capability like nanotechnology human cloning and artificial intelligence Like them it does not as yet exist in the sense of being clearly demonstrable and publicly available Like them it is maturing in laboratories where the question if has been replaced by the question when and like them the implications of its appearance as a basic infrastructure technology are profound and merit careful consideration Nobuyoshi Terashima What comes after the Internet Imagine a world where it is difficult to tell if the person standing next to you is real or a virtual reality and whether they have human intelligence or artificial intelligence a world where people can appear to be anything they want to be HyperReality makes this possible HyperReality offers a window into the world of the future an interface between the natural and artificial Nobuyoshi Terashima led the team that developed the prototype for HyperReality at Japan s ATT laboratories John Tiffin studied they way HyperReality would create a new communications paradigm Together with a stellar list of contributors from around the globe who are engaged in researching different aspects of HyperReality they offer the first account of this extraordinary technology and its implications This fascinating book explores the defining features of HyperReality what it is how it works and how it could become to the

information society what mass media was to the industrial society It describes ongoing research into areas such as the design of virtual worlds and virtual humans and the role of intelligent agents It looks at applications and ways in which HyperReality may impact on fields such as translation medicine education entertainment and leisure What are its implications for lifestyles and work for women and the elderly Will we grow to prefer the virtual worlds we create to the physical world we adapt to HyperReality at the beginning of the third millennium is like steam power at the beginning of the nineteenth century and radio at the start of the twentieth century an idea that has been shown to work but has yet to be applied This book is for anyone concerned about the future and the effects of technology on our lives Peru, the third millenium ,1994
